

STARCRAFT

Redefining the Legend

1998
BOAT CATALOG

FOR 95 YEARS, PEOPLE WHO LOVE BOATING HAVE COUNTED ON STARCRAFT.

Founded in 1903 as the Star Tank Company, Starcraft has become a legend to generations of boaters.

Today, as an independent company, Starcraft is "Redefining the Legend." Starcraft offers an incredible selection of outstanding boats for just about any family's needs and budget. From our new Pro-Elite Series, GT Series, LX Series and Expedition Series to our redesigned pontoons, you'll find Starcraft leading the way.

You will also find our field proven products, like the Superfisherman, Fishmaster, Utilities and fiberglass runabouts, continue to provide great value for the boating experience. See the new 1998 Starcraft line-up today and find out what legends are made of.

Redefining the Legend

STARCRAFT FISHING BOATS

REDEFINING THE LEGEND:

With a mixture of dramatic new models and welcome redesigns of longtime favorites, it's readily apparent Starcraft is not only "Redefining the Legend" but redefining the fishing boat industry as well.

One glance at the magnificent Pro-Elites, with their massive array of fishing features, tells you this is already the fishing boat of the 21st Century. Designed for serious big water fishing, these tournament-style, deep-V powerhouses are the longest, widest and deepest boats in their class. The Pro-Elites feature wide beams (a whopping 102" on the 2000), enormous livewells, an onboard battery charger, true dry storage, aerated baitwells and a seemingly endless list of standards that will stir the hearts of anglers everywhere. To show our faith in these fishing machines, we're backing them up with an amazing 15-year warranty.

We're not stopping there, either. Our popular Islanders, already well known and respected among offshore fishing fans, have been retooled to become better than ever. Plus, we're introducing two new aerodynamic twenty-footers, including an I/O model. Both the Superfisherman and Fishmaster Series, loved by anglers for years, are even more fish-functional than before.

Even with a stellar lineup of rugged aluminum fishing boats, we haven't forgotten those who prefer the strength of a fiberglass hull pounding through the waves in search of lunkers. Our Tournament Pro Series is built with a composite stringer system and a full glass liner floor for easy maintenance. Inside, it provides a wealth of professional features that will thrill anyone who enjoys serious fishing. In fact, those features are why the Tournament Pro is the official boat of the North American Walleye Anglers.

Throughout our fishing boat lineup, we build boats that will stand up to the roughest conditions for years to come. In our aluminum boats, the Torsion Beam Construction stringer system, custom-built for each hull, provides exceptional shock absorption along with a properly shaped running surface for excellent performance. All floors in our aluminum boats are made with 3/4" 7-ply pressure treated wood, giving you years of solid support, and sandwich-injected foam increases the floor's strength while reducing noise and vibration. Double riveting gives our boats both the strength and flexibility to withstand the meanest chop. And, the scratch resistant heat-cured urethane finish keeps your boat looking its best year after year.

Inside, our composite seats are wrapped in UV-resistant vinyl, so they keep their brand-new look for years, and pinchless seat hinges protect your fingers. Plus, we're using H-31 seat hardware, which meets the American Boat and Yacht Council standard for boat safety, passing impact tests similar to the automobile industry's bumper impact tests.

So, whether you desire the challenge of big water fishing, or prefer the simple pleasures of a quiet lake; whether your fishing adventures require all the professional features you can find, or whether a car-topper suits you just fine; you'll find Starcraft has exactly the right boat for you.

Starcraft fishing boats truly let you enjoy "life in the cast lane".

Starcraft's unique Torsion Beam Construction stringer system is a pre-assembled structure custom-built for the specific hull it will be installed in, and combines strength with flexibility for exceptional shock absorption. Running from stem to stern, it dissipates the impact of pounding waves along its entire length. Together with the Power-Trac hull, which features a full-length reverse chine, the custom-fit design of the stringer system produces a properly shaped running surface for smoother overall performance.

When pounding through rough waters, you'll appreciate the superb strength of your Starcraft aluminum boat. Longitudinal lifting strakes, the Torsion Beam Construction stringer system and the transverse bow ribs create a rock-solid foundation that can easily take whatever Mother Nature throws your way.

Starcraft uses 5052 H32 marine grade aluminum alloy because it offers the greatest tensile strength and the greatest corrosion resistance.

You'll enjoy years of solid support, thanks to the 3/4" 7-ply pressure treated wood floors found in every Starcraft aluminum boat. The wood won't warp or rot, reducing any maintenance worries. Once the floor is installed, we inject sandwich foam underneath the floor. This fills all air pockets to prevent water from leaking in, and also acts as a sound deadener while strengthening the floor and hull.

To give your boat the best combination of flexibility and strength, we use aircraft-style double riveting. This produces a boat that will hold together far longer than welded boats, and that can withstand the punishment of the meanest waters with flexible ease.

All Starcraft boats are certified by the National Marine Manufacturers Association and meet or exceed U.S. Coast Guard standards.

All aluminum surfaces are scuff sanded and chemically cleaned prior to painting, ensuring better paint adhesion and corrosion resistance. The paint is heat cured urethane, which is scratch resistant and gives the hull of your aluminum boat a bright glossy look that lasts for years.

FEATURES AND BENEFITS

Spotting fish is never a problem in your Starcraft, since many models feature elevated casting platforms. In the Pro-Elite 2000, the spacious bow area includes an enormous 50-gallon livewell and several storage compartments, including a true dry storage area. The power air ride pedestal seat easily adjusts up and down to comfortably accommodate any angler.

The fish never had it so good. Spacious livewells are found throughout our fishing boat lineup, with the Pro-Elites setting the standards for livewells of the future. These aerated, Roto-Cast livewells have radius corners to protect your catch from harm, and feature the Flow-Rite Livewell System to keep the livewell fresh and clean. This system also automatically regulates the operation of the livewell for you, whether you're fishing or up on plane. In addition, the Pro-Elite 2000 livewells are illuminated so your catch isn't left in the dark.

Fishing boats require excellent rod storage, and Starcraft fishing boats easily meet that requirement. Many models have both port and starboard rod storage compartments, and most are lockable to keep your gear secure. In the Pro-Elites, one door folds down, leaving you room to place equipment on the top door, which lifts up when you're ready to pull your rods out.

You can take charge of the lake, and your Pro-Elite, with this bow electronics command center. It features an engine trim switch, plus livewell and baitwell fill switches. An additional switch and indicator gauge let you quickly monitor the condition of your batteries. You'll also find plugs for the trolling motor and battery charger, along with a 12 volt accessory plug. The lockable storage compartment is a handy place to store those accessories.

When you're out on your Pro-Elite, the fish won't be able to outlast your battery power. That's because one of the many benefits of owning the fishing boat of the 21st Century is the on-board trolling motor battery charger system. You'll be able to keep your batteries fresh, plus you've got room to store three batteries.

Sitting at the console of a Starcraft fishing boat is almost as exciting as all the fish you're going to catch. Easy-to-read gauges, circuit breakers, room for your electronics gear, deluxe steering wheels and more make piloting your boat a breeze.

Starcraft fishing boats are designed to combine convenience with functionality. The starboard aft in the Pro-Elite 2000 includes a large storage area with a lift-out cooler, along with a switch panel to operate the rear livewell and baitwell. There's also a gas tank switch that allows you to switch from your main tank to the 5-gallon reserve tank.

You may know where the fish are, but you still need some bait to catch 'em. In the Pro-Elites, you'll find two Roto-Cast baitwells, one in the bow and one aft. Both two-gallon units are aerated, so your bait will stay as fresh as your catch.

Throughout Starcraft's fishing boats, you'll find a generous amount of storage room for all your gear, large and small. On the Islander 2001, for example, this padded seat back easily pulls out to provide you with a handy little storage compartment.

You'll enjoy superb handling, stability, and cornering plus faster planing with Starcraft's Power-Trac hull. This hull features a reverse chine that runs the full length of the boat, and channels water away from the boat for a drier ride. We take special care to ensure the rivets along the chine are straight, providing you with truer performance.

You can see how efficiently the console area of the Islander 2001 is designed. There's a fixed, Roto-Cast swivel seat with storage underneath, and foldout footrest for the captain. The gauges are all easy to read, and the stereo has a protective cover. Even when open, the cabin door is out of the way, and the radius windshield gives you a clear view of the fish.

To simplify your fishing life, we've moved the trolling motor plug on our bass boats off to the side. This makes installing and operating your trolling motor easier and more convenient.

PRO-ELITE SERIES

PRO-ELITE SERIES STANDARDS:

- 3 Battery Holders • Stainless Steel Bow & Stern Eyes • 4 Mooring Cleats
- 54 Gal. Fuel Tank w/Dual Vents (1800 - 37 Gal.) • Stepped Transom for Kicker Motor • Marine Grade 16 oz. Carpet • EZ Access Wire Harness
- Stargrip Eurocoat Non-Skid Gunnel Decks • 4 Deluxe Fishing Chairs w/Composite Frames • 4 Air Ride Pedestals • 5 Seat Bases • Elevated Casting Decks w/Storage • Port & Starboard 8' Rod Storage • 3 Battery Storage Compartments (2 in 1800) • Bow Electronics Command Center w/Plug, Tilt Switch & Aerator Switch • Elevated On Deck Bait System (2 in 2000)
- Bow Dry Storage • Deluxe Side Panels w/Full Cockpit Toe Kick • Insulated Livewell Lids • Deluxe Color Coordinated Instrument Panel • Tilt Steering (N/A 1800 T) • Deluxe Steering Wheel (N/A 1800 T) • Speedometer • Voltmeter • Tachometer • Fuel Gauge • Horn • 12 Volt Accessory Plug-In (2 in 2000) • Fixed Antenna • 50W AM/FM Stereo Cassette
- 4 Marine Grade Speakers • McGill Single Lite Euro Switches • Bow & Stern Courtesy Lights • Illuminated Aerated Livewells: 50 Gal. Bow (1800-40 Gal.) & 21 Gal. Aft • Bow & Stern 2 Gal. Aerated Baitwells (1800 Bow Only) • Roto-Cast Livewells w/Radius Corners, Timers & Flow Rite Systems Valve • Automatic 750 GPH Bilge Pump • Livewell Flush-Out System • Removable Bow Light w/Courtesy Light
- Non-Flare Removable Stern Light • Circuit Breakers • 12/24V Bow Heavy Duty Recept. & Plug w/Charger Plug • On-Board Trolling Motor Battery Charging System • Dual Battery Indicator Gauge • No Feedback Steering

PRO-ELITE SERIES OPTIONS:

- Fish Package: Lowrance® X-65 Depth Finder, MotorGuide® 756-60" Trolling Motor w/Gator Mount • Mooring Cover • Bow Tonneau Cover (N/A 1800 T)
- Hydraulic Steering (N/A 1800 T)

PRO-ELITE 2000 EXTRA STANDARDS:

- 5 Gal. Fuel Safety Reservoir • Port Console Accessory Storage • Port & Starboard Console Storage • 24 Qt. Cooler • Stern Side Panel Storage
- Large Walk-Thru Radius Windshield • Large Deluxe Port Glove Box

PRO-ELITE 2000 EXTRA OPTIONS:

- Drop Curtain • Side Curtain Set • Aft Curtain Set
- Stand-Up Bimini Top

PRO-ELITE 1800 DC EXTRA STANDARDS:

- Port & Starboard Console Storage • Smoked Plexiglass Windscreens
- Large Deluxe Port Glove Box

PRO-ELITE 1800 DC EXTRA OPTIONS:

- Drop Curtain • Side Curtain • Aft Curtain Set • Stand-Up Bimini Top
- Walk-Thru Radius Windshield

PRO-ELITE 1800 SC EXTRA OPTION:

- Smoked Plexiglass Windscreen
- Port Console • Walk-Thru Radius Windshield (Requires Port Console)

STARCRAFT FIBERGLASS BOATS

REDEFINING THE LEGEND

In fiberglass, "Redefining the Legend" means providing new excitement for thrill seekers and deep water adventurers alike.

The GT Series offers the young at heart exhilarating performance and eye-opening graphics. Inside, you'll find plenty of leg room with molded inserts under the consoles and a full-width rear bench seat and padded surdeck for laid-back enjoyment. Open bow models include a glass liner floor for easy maintenance.

Family runabout fans will enjoy the luxury found in the LX Series. Softer colors, rear jump seats and adjustable back-to-back seats help make the boating life a relaxing one. An optional design plan allows the open bow LX models to come equipped with bucket seats and a rear bench seat.

For those who prefer offshore fishing excitement, Starcraft introduces the Expedition Series, which includes both Walk-Around and Center Console

models. Massive fish boxes, insulated storage compartments, sturdy rod holders, composite stringers, a tremendous amount of fish-fighting room and much more will make big water fishing an Expedition well worth taking.

We haven't forgotten those of you who like to combine the best of both boating worlds. Our Fish & Ski models allow you to take family and friends to your favorite fishing hole to catch a few trophies. When the fish stop biting, you can pull your crew on a few high-powered slalom runs around the lake.

And, every Starcraft fiberglass boat is built to last. Multiple layers of woven roving, state-of-the-art Euro-style consoles and more, combine to give you a boat that will provide years of superior performance. Packed with superb features like those you see here, 1998 promises more legendary excitement for you ... from Starcraft.

After it has been thoroughly prepared and inspected, the mold receives the first layer of the highest quality gelcoat and resins available.

Each hull is treated with two layers of 24 oz. handlaid woven roving on the running surface. Chines and keel receive an additional 8" wide reinforcing strip of woven roving to improve strength and reduce flex and cracking.

Applying the first layer of multidirectional fiberglass strand eliminates pattern print-through from the woven roving.

A Spraycore® barrier coat is applied to the sidewalls allowing more strength and rigidity with less weight, eliminating hot spots during lamination, for an improved finish.

Each boat's stringers are fully encapsulated to eliminate water intrusion that causes dry rot.

The floor is drilled and foam is injected for floatation and noise reduction. The holes are sealed over to provide a more rigid, water tight and quiet hull for optimum performance.

Woven roving is handlaid and rolled to eliminate air pockets. This provides a long lasting, top quality finish and added strength and durability.

All Starcraft boats are certified by the National Marine Manufacturers Association and meet or exceed U.S. Coast Guard standards.

While you're working on your tan, the Bimini top stores neatly away under the side deck, where you can quickly pull it out when you want a little shade. The storage area contains no wood, providing years of easy maintenance.

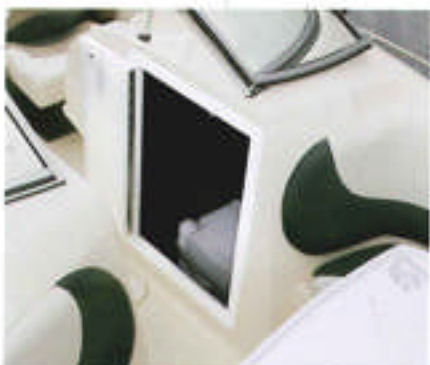

Once you're out on the water, getting into the water is easy with the recessed swim ladder found on many models. The non-skid cover is part of the integrated swim platform, keeping the ladder hidden when not in use and allowing full use of the platform when you're swimming or diving.

If you like the feel of carpet under your feet, the optional carpet on glass liner boats is easy to install. Instead of thumb-wrenching button snaps, Velcro® straps make placing carpet in your Starcraft a very simple process.

We designed your Starcraft to provide you with hours of enjoyment each time you take it on the water. For example, the Starship 2005 cockpit area contains a fiberglass head for your comfort. A built-in sink allows you to grab a cool drink of water, and your glasses stay safe in the nearby cupholders. Under the sink is a 48 qt. cooler, for your favorite picnic supplies.

A standard Porta-Potti® is designed to fit into the passenger side console base of the 2210 LX.

The 1980 Expedition helm features a padded leaning area, 48 qt. cooler, two rod holders and storage under the seat. Remove the optional seat back and you have two more rod holders.

In the 2280 Expedition, a padded seat in front of the console also contains a Porta-Potti, allowing you to fish comfortably all day long.

When you're taking advantage of the fishing part of your Starcraft Fish & Ski, the aerated livewells will keep your catch fresh. The 1809 Fish & Ski has livewells in the bow and stern; the 1709 has a bow livewell.

The Expeditions are designed for serious fishing, as shown by the spacious bow area of the 2280. This non-skid front deck includes a huge fish well and two large storage areas (all insulated), plus padded combing panels, surrounded by stainless steel welded bow rails.

The fishing is easy from the bow of your 1709 Fish & Ski. Take out the removable bow cushions, put the fishing seat in the built-in seat base and you're in business. The high bow area gives you a nice raised casting platform to help you quickly spot the fish.

EXPEDITION SERIES

2280, 1980 EXPEDITION STANDARDS:

- Non-Skid Decks • Welded Stainless Steel Bow Rails • Anchor Locker
- Battery Storage at Rear • Stainless Steel Hardware • 2 Rod Holders • Bow Platform w/Large Insulated Fish Well & 2 Insulated Storage Compartments
- Non-Slip Self-Bailing Fiberglass Liner • Contoured Plexiglass Windshield
- Stainless Steel Grab Rails • Stainless Steel Steering Wheel • Deck Fitting Fuel Fill • Navigation Lights • Automatic/Manual 1250 GPH Bilge Pump
- Dual Battery Crossover Switch • Lockable Electronic Compartment • Chart Tube • Large Baitwells w/Radius Corners • Stern Cleats 8" S/S w/Hawse Pipes

STARCRAFT PONTOON BOATS

REDEFINING THE LEGEND

"Redefining the Legend" in our pontoons means increasing your comfort. Luxurious new furniture, redesigned consoles, color-coordinated carpet and new cocktail tables are just the start of the enjoyable amenities you'll find in Starcraft pontoons. We're also providing you with a remarkable variety of models to choose from, including several I/O models, with something for every boating family.

The Stardeck Elite models exemplify class with grace and style. Spacious L-group front and rear lounge seating, barrel chairs and padded sundecks let you relax and enjoy the sunshine. Built-in coolers, sinks and tables make any spot on the lake a picnic spot, and the color-coordinated Bimini top provides plenty of shade. The curved front decks and panels provide a sleek, streamlined appearance, and the optional composite floor is wood free.

Relaxation also defines the Stardeck Classics. Plenty of room for a full crew of family and friends, lots of seating, padded sundecks and your favorite tunes on the stereo help make any outing a pleasure cruise. Pack your favorite refreshments in the cooler and pack all your good time gear in the ample storage areas, and you're set for a full day of enjoyment.

If you like to mix in a little fishing while enjoying the comforts of your pontoon, then try a Starfish. Fishing seats and livewells combine with a variety of relaxing amenities to offer you and your crew plenty of memory-making voyages.

Starcraft pontoons are built to go on many voyages. Welded pontoon tubes with separate bulkheads for better floatation, long lasting support from floors made with 3/4" 7-ply pressure treated plywood and sturdy durable transoms are just a few of the solid construction features making your Starcraft pontoon a delight to own for years to come. And, to backup our construction, we're providing limited lifetime warranties on the decks, transoms and tubes for your peace of mind.

For relaxing pontoon pleasure that's truly legendary, climb aboard a Starcraft pontoon.

Each pontoon chamber is tested by air valves for any leaks in the weld seams.

After being jig-assembled, all side fences are analyzed prior to final assembly to eliminate oxidation and discoloration.

Thru-bolting is used to provide proper deck fastening and the elimination of screw heads backing off.

Side panels and corner caps are affixed after carpet is installed. All stainless steel hardware is thru-bolted through the extrusion, deck and "Z" bars.

For smoother, more efficient performance, we add an aluminum liner underneath the deck of each I/O pontoon. This keeps water from splashing against the cross members, which creates drag that makes the engine work harder than necessary. The liner starts behind the splash fins on the tubes and lets the pontoon cruise effortlessly at faster speeds.

The spacious rear lounge area in the 240 Elite demonstrates why Starcraft pontoons are made for entertaining. A curved L-shaped bench seat provides plenty of stretching-out room and the swivel barrel chair is very comfortable. The removable, fiberglass cocktail table makes a handy picnic area and the padded sundeck is a great place to enjoy the scenery. An extra wide helm seat means plenty of room for the captain, and even the first mate.

For greater enjoyment, all Starcraft pontoon consoles have been redesigned for 1998. The ABS dash in the Stardeck 240 Elite features a Lowrance® 3500 in-dash depth finder, sport tilt steering wheel, 12 volt accessory plug-in, sink, with fresh water pump, full instrumentation and more.

Storage, storage, storage, and even more storage. You'll find plenty of storage room for all your fun-in-the-sun gear throughout your Starcraft pontoon, including the arms of the chaise lounges. Just pull the flap aside and you've got room for swimming gear, sunbath lotion, magazines and more.

If you need even more room to relax, or to enjoy an afternoon nap, the front lounge on your Stardeck Elite quickly turns into a comfortable "water" bed.

Accessing the engine is your Starcraft I/O pontoon is easy. The center panel of the padded sundeck lifts up to display a large, carpeted storage area. A hinged floor in the compartment slides back allowing you to check on the engine and perform any minor adjustments.

Pack a lunch along with your favorite refreshments. This convenient cooler in the Classics stores easily under the console so it's out of the way, yet right there when it's time for a break.

Designed convenience is everywhere you look in a Starcraft pontoon. Placing beverage holders where they're always within easy reach is just one of the many thoughtful touches you'll find in your Starcraft.

Take all day to stay and play. Your Starcraft pontoon is made for entertaining, as shown by the bow of the Stardeck 240 Classic. A relaxing bench seat, two comfortable barrel chairs and a redesigned cocktail table provide a nice spot to socialize with your friends.

All Starcraft boats are certified by the National Marine Manufacturers Association and meet or exceed U.S. Coast Guard standards.

WARRANTIES • CLOTHING • TRAILERS • MOTORS

STARCRAFT 1998 LIMITED WARRANTY

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up our quality construction. Starcraft warrants each Pro-Elite aluminum hull for fifteen (15) years, all other aluminum riveted hulls for ten (10) years, and all fiberglass boats for five (5) years. Starcraft pontoons carry a lifetime warranty on the deck, tubes and transom. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

Starcraft boats are packaged with sturdy, dependable trailers, including EZ Loader trailers on some models, providing more value to you. The frames are welded for extra strength, and the trailers include transom tie downs, carpeted bunks, painted wheels and submersible lights.

Most Starcraft boats come standard with a Mercury®, Mariner® or Force® outboard motor or MerCruiser® stern drive with standard and optional horsepower matched to each hull for optimum performance and economy.

Look sharp while enjoying your Starcraft boat with official Starcraft clothing. Just call 1-800-237-3948 ext. 480 to make your selection.
