

STARCRAFT
MARINE

First on the water since 1903.

We've made more than waves

for 97 years.

We've made history.

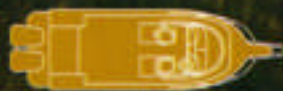

MODEL YEAR
2000

Offshore, impoundments, big water

Big water, serious game fishing

All-around fun, family fishing

Expedition *pg. 14*

Starcaster *pg. 26*

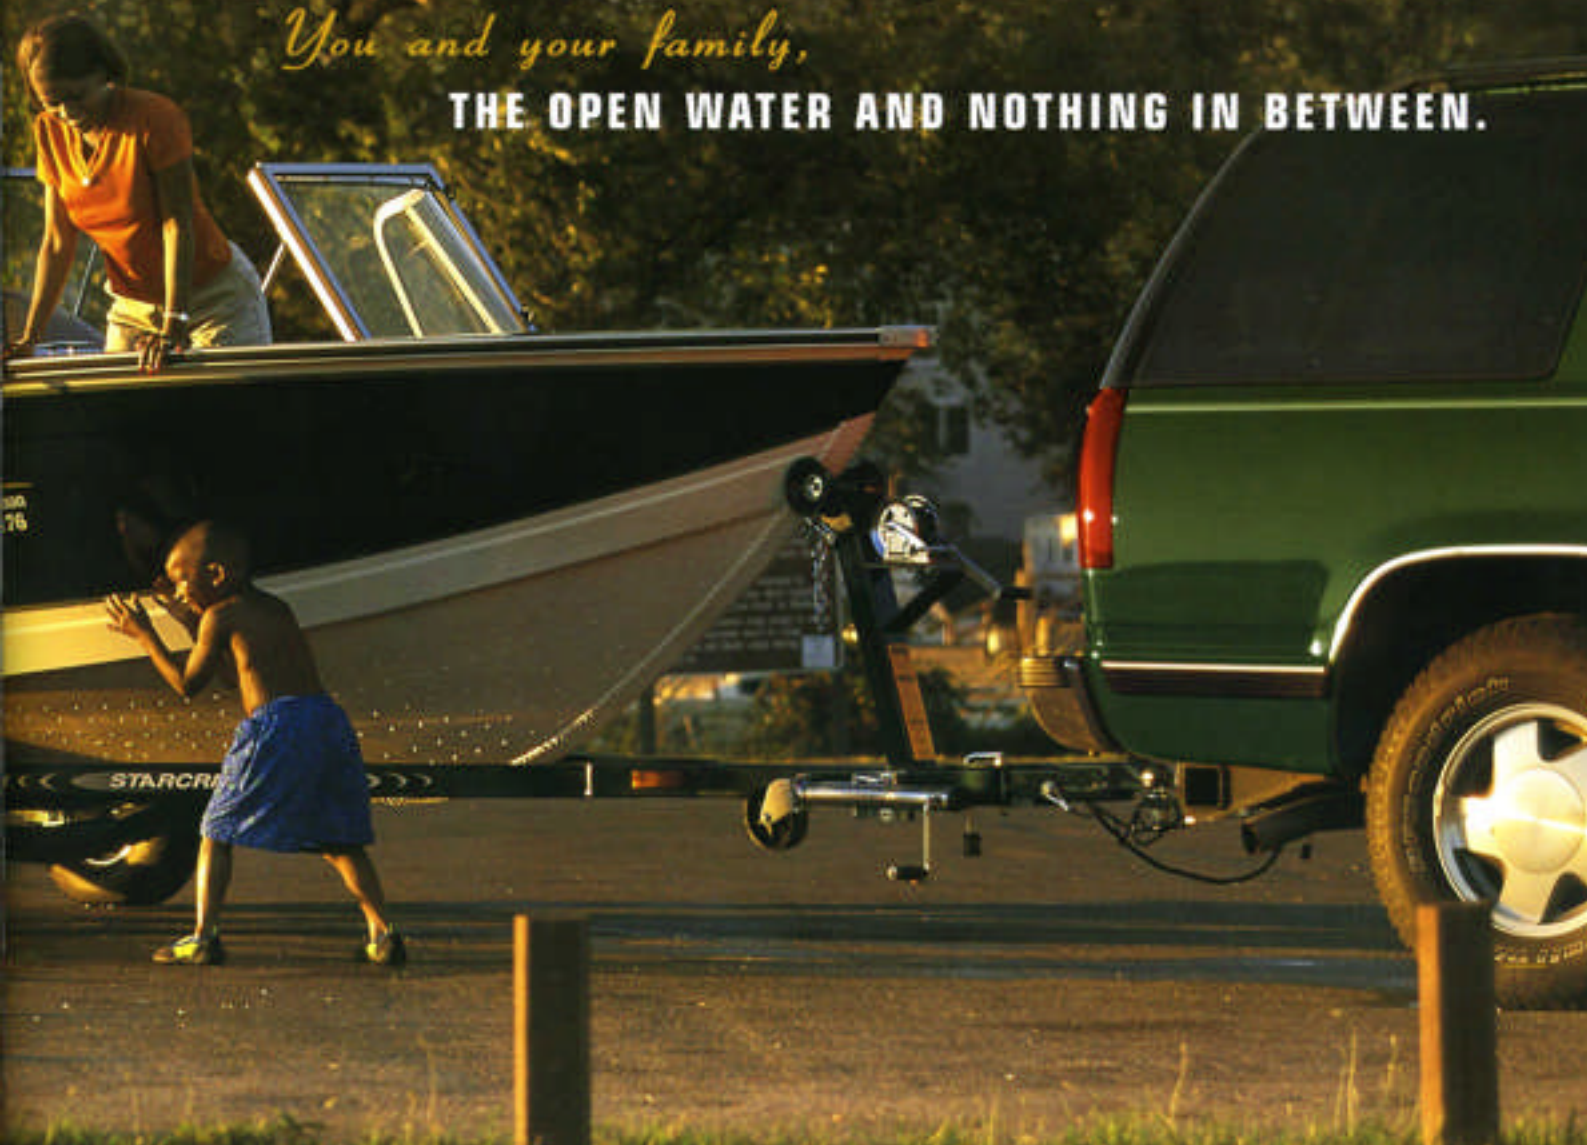

Nothing feels better than the ultimate freedom of the open water. We know that. Which is why we work so hard. Every company has a philosophy. Ours is to design and build boats so you and your family can enjoy trolling for your favorite catch or living life at full throttle, wide open. At Starcraft, we're building boats you can believe in. Boats that are tried and true. And we stand behind each one. It's been that way for more than 97 years. It'll be that way for another 97. After all, we're already

working for a future generation of boaters, well into the next millennium.

It's that simple. To help you capture the freedom of fishing a cool Saturday morning or the thrill of screaming through the air strapped to a wakeboard, Starcraft Marine offers a line of boats that'll keep you connected to the water, whether you're headed into the ocean or onto a lake. Deciding which Starcraft to buy could be all that stands between you and a summer to remember.

You and your family,

THE OPEN WATER AND NOTHING IN BETWEEN.

Fish, ski, sun

MERCURY

With decades of engineering leadership, dozens of performance records, hundreds of racing trophies and millions of satisfied customers, Mercury Marine products reflect a heritage of quality, performance and dependability that's the envy of the industry and why we offer Mercury Marine propulsion exclusively on all our boats.

Every wake tells a story.

OURS IS A ROCK SOLID HERITAGE THAT STANDS BEHIND YOU.

Thumbing the key to a brand new Starcraft does more than just turn on a well-designed watercraft. It turns back the hands of time and fuels a legacy spanning more than 97 years on the water. A legacy that includes a hard-working man who had a different idea about building boats. His name is Harold Schrock. And back in 1959, he told a young reporter that he didn't care about building all the boats in the country, but about building boats he'd be proud

to own. Pretty simple words from a man who loved what he did. At Starcraft, that legacy has been passed down to us. To people like Starcraft president Doug Schrock who's every bit as particular about boats as his dad was. It seems our boats have been woven into a North American legacy of water and families for generations. And we've got the pictures to prove it. Go ahead. See for yourself what 97 years on the water looks like.

1905: The Star Tank Company opened its doors in Goshen, Indiana.

1930: In the '30s, we hopped the wake and were the first to make a rowboat from galvanized steel.

1952: In the early fifties, we were the first to successfully market an aluminum fishing boat known affectionately as "the tub."

1960: Back in the teens, when other boat companies were still building boats out of wood, we started making them out of metal.

1960: We introduced the first gull-wing hull, a revolutionary design that rocked the industry and established Starcraft as the premier aluminum fishing boat company.

1964: We introduced the first aluminum hull (10' and outboard) big-water, overnight boat called the Clifton.

1991: We introduced the first reverse chine hull to increase the performance and stability of our aluminum boats.

1998: We introduced the first 20', 102" beam aluminum fishing boat called the Pro-Elite. And introduced our revolutionary Power-True Hull® design.

1990: We swam upstream once again with a new manufacturing process that utilized longitudinal stringers rather than transverse ribs for a more consistent hull surface and a stronger boat.

1997: We introduced our revolutionary Torsion Beam Construction.

2000: We introduced the widest 19' fiberglass boat in the industry called the Neostar that'll carry us well into the 21st century.

For a Starcraft engineer, IT'S JUST ANOTHER DAY ON THE WATER.

There seems to be some debate as to what makes our boats so strong. Some say it's measured in our company's history. Others say it's tied to the technology in our construction. One thing's for sure: We're building extremely well engineered boats with tough, hard-hitting hulls. Test it for yourself. Put our exclusive Power-Trac Hull® through the paces. We have.

It's in the details. If you could lift up the carpet or look under the floor, you'd find injected foam instead of poured foam, which bonds the hull and the floor together for a stronger boat. For 2000, we've also redesigned some of the battery storage compartments to accommodate three 12V batteries to allow for more options like higher thrust trolling motors. And to keep the outside of our boats clean, we

This maneuver is performed by a trained driver under controlled conditions. We do not recommend operating your boat in this manner.

run all the drains to the stern to reduce the chance they'll get bumped or broken in shallow water. It also eliminates ugly sludge stains. Some people might call that obsessing over minor details. To us, it's just a part of building boats.

Marine Grade Aluminum

Our 5052 H34 marine grade aluminum alloy provides the greatest tensile strength and corrosion resistance.

Plasma Arc Cutter

Our state-of-the-art cutting process incorporates the latest technology to cut raw aluminum precisely and efficiently, ensuring every Starcraft hull meets our exacting quality standards.

Double Riveting

Ensures a tighter seal and increases the strength and structural integrity of the hull.

Injected Foam

Foam is injected, not poured, between the hull stringers and the deck, which fills all air pockets to prevent water from leaking in, increases hull strength and decreases noise and vibration.

PAINT PROCESS

Marine grade 5052 H34 aluminum

Hand sanded for a better finish

Wiped down with lacquer thinner

Coated with a zinc chromate primer

Processed through the spray booth with two coats of the highest grade polyurethane enamel

Baked again with an infrared process at 250°

Baked with an infrared process at 250°

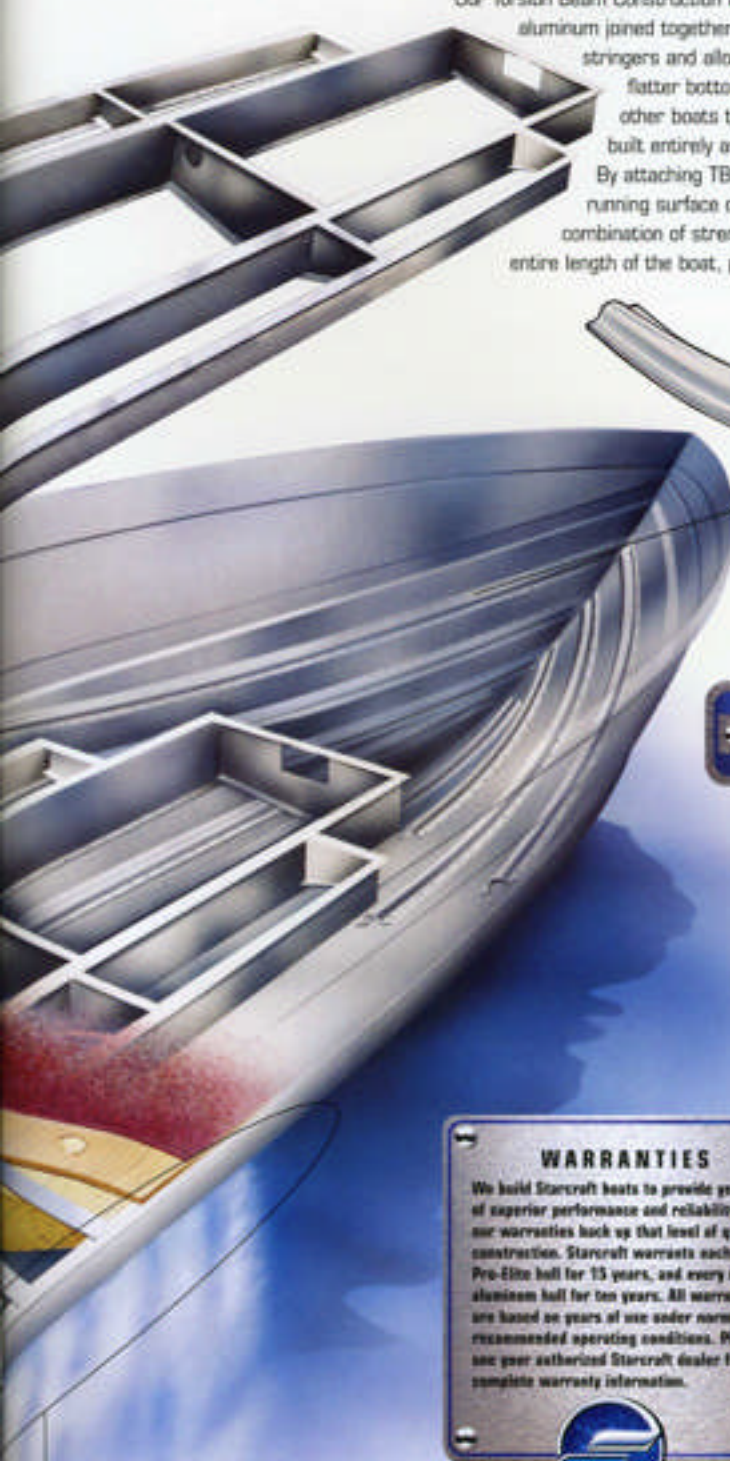

Applied UV protected, weather-resistant graphics

Transom/Bow End Caps

Anodized to eliminate oxidation and discoloration and improve the exterior finish.

Exclusive Power-Trac Hull® with Torsion Beam Construction

Our Torsion Beam Construction (TBC) stringer system is a pre-assembled structure of longitudinal fabricated aluminum joined together by a series of transverse bulkheads. TBC is stronger and lighter than competitive stringers and allows for a consistent and safer V-hull (competitors use flat I-beams which create a flatter bottom, a wetter ride, and the flat I-beams limit longitudinal strength in the bow). Unlike other boats that are installed in three pieces (ribs, bulkheads and stringers), our TBC structure is built entirely as a single unit to exacting specifications, separate from the construction of the hull. By attaching TBC directly to the hull skin, we create an integral unit with a cleaner and smoother running surface on which to run the boat. And because of the superior torsional strength — a combination of strength and flexibility — TBC dissipates the impact of pounding waves along the entire length of the boat, providing exceptional shock absorption from stern to stern.

Our construction process combines our exclusive Power-Trac Hull with TBC stringer system and these unique machine formed ribs to produce a hull that's stronger and lighter than our competitors who simply add an extra layer of aluminum. This type of hull construction lacks the shock absorbing combination of strength and flexibility of our Power-Trac Hull, and is more prone to cracking and collapsing in rough water.

Machine-Formed Rib

Two-Ply Aluminum

WARRANTIES

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up that level of quality construction. Starcraft warrants each Pro-Elite hull for 15 years, and every other aluminum hull for ten years. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

Full-length Reverse Chine

Working in conjunction with TBC is a full-length reverse chine hull. While our competitors use only a partial chine hull, we run ours the entire length of the boat to increase performance characteristics. By pushing the water down and away, our boats have a better running surface and are quicker on plane and much drier. Plus, they really grab the water through the turns. In addition, our hull provides exceptional handling and stability in almost any kind of water.

The way we see it,

WHAT GOOD IS A WELL-BUILT BOAT IF IT CAN'T THINK.

Are we too demanding? Is enough ever really enough? Heck no. At Starcraft, we figure the day Mother Nature makes it easier to fish and ski is the day we'll stop integrating more and more technological features into our boats. We've even conquered the force of gravity with our TechWell 2000® live well system with three optional settings to help keep your catch healthier. It's all part of our mission to build the kind of boat you'll be proud to pass down to your kids when they're ready to take on Mother Nature. Whether you're up in the bow or back in the stern, you'll find we've thought of just about everything.

NexGen® Instrument Panel

These stylish gauges are ergonomically designed to optimize ease-of-use by allowing you to view instruments over the top of the wheel rather than through it. The NexGen® panel also allows you the freedom to add additional gauges without sacrificing its sleek appearance. It's unique for the aluminum market and comes with a 3-year warranty.

Full-length Cockpit Toe Kick

To help you pull in your catch, the Pro-Elite, Islander 2000/2001, Superfisherman and Fishmaster Series feature revolutionary toe kicks that allow you to step all the way up to the gunwale without having to lean over. Standing safely provides additional support and increases your comfort.

EZ Loader Trailer

For easy loading, unloading and trailering, Starcraft boats feature quality built EZ Loader trailers, and many feature Goodyear radial tires.

New for 2000: Pinchless Ergo Dynamic Seats with Power Pedestal

These new pinchless seats feature no visible hardware and are a one-of-a-kind offering in the aluminum boat industry. They turn in a smaller radius and are ergonomically designed to provide additional lumbar support. Power Pedestals are also available and may be adjusted between 13" and 17". In addition, all seats and seat hardware are subjected to a battery of tests to ensure they meet or exceed all industry standards for durability.

Sure Step® Deck

Our high-grade, UV protected non-skid vinyl floor covering on our new rear entry model portcoons reduces the risk of slipping and sliding.

RECIRC
In the RECIRC position, the outside water is prevented from entering the live well, while the control valve maintains to allow the pump to recirculate and aerate the water. This is ideal for times when the outside water is undesirable, like when you're refueling dockside or drifting through choppy water.

AUTO
In the AUTO position, the venturi pump is turned on, and when the boat is off plane, fresh water is constantly blended with recirculated live well water. When your boat is on plane, the control valve will automatically close the transition port to prevent water loss and the venturi pump is automatically diverted to closed recirculation duty. The boat is brought off plane, the valve will open the transition port again to allow fresh oxygenated water back into the live well.

EMPTY
In the EMPTY position, the control valve allows the water to exit the transition drain without allowing water to re-enter. This check feature is ideal for tournament anglers since they don't have to remember to close a live well drain prior to launching as the control is already in the EMPTY position. Water will automatically be prevented from entering the live well as the boat is backed into the water, so the boat isn't required to chafe out of the hole with hundreds of pounds of unwanted water in the live well.

On-board Battery Charger
The Pro-Elite features an on-board 10 amp dual battery charger so you won't ever be left with an uncharged, non-cranking battery.

Premium Three-position Automatic Control Valve
Whether you're on plane, off plane, or trailering your boat, the Flow-Rite® control valve allows you to fill, recirculate and drain water from a single control.

TechWell 2000® Live Well System

The Pro-Elite Series

STOPS 20-POUNDERS OUT THERE FROM LAUGHING AT YOU.

There are times out on the water when the fish actually seem to mock you. Despite your best efforts, they're elusive. But not when you're in the Pro-Elite. It's generously equipped with the toughest fish-fighting arsenal going. Featuring standard power pedestals and ProForm® ergo dynamic seats. The largest live well in its class. Enough trolling motor battery storage for three, not just two, 12V batteries. More cockpit space for battling the fish. And all the bells and whistles you'd expect from a top-of-the-line fishing machine. With a 102" beam on the 2000 model (compared to the mid 90" range of a typical 20 footer) and a deeper deadrise, the Pro-Elite delivers a smooth, stable ride even with the hammer all the way down. The Pro-Elite Series. Performance and function in one powerful package. Look who's laughing now.

- 1. New Proform fishing seats with composite frames:** Redesigned for better ergonomics, increased durability.
- 2. Trolling motor battery storage:** Accommodates three 12 V batteries for increased dependability.
- 3. Bow storage:** Roomy bays to stow your gear.
- 4. Bow command center:** Provides easy access to all controls while you're fishing.
- 5. 8' rod boxes:** Provide plenty of storage for your rods.
- 6. TechWell 2000® illuminated and insulated live well:** Unique system features three settings to help keep fish healthy.
- 7. Starboard built-in tackle storage:** Provides convenient storage for tackle while running.
- 8. Bow and stern aerated bait wells:** Provide easy access to bait while fishing.

Standard Features

Hull Construction

- Power-Trac Hull with Tension Beam Construction
- Stainless Steel Bow & Stern Eyes
- 4 Mooring Cleats
- 54 Gallon Fuel Tank w/Dual Vents and 5 Gallon Fuel Safety Reservoir (2000)
- 37 Gallon Fuel Tank (1800)
- Internally Vented Fuel Fill
- 25" Stepped Transom for Kicker Motor (2000)
- 3/4" 7-Ply Pressure Treated Floor & Deck
- Marine Grade 10 oz. Carpet
- Marine Grade 5052 Aluminum
- Marine Grade Vinyl
- Vinyl Rib Rail
- StarDrip Gunwale Decks
- Limited Lifetime Deck Warranty
- 15 Year Pro-Rated Hull Warranty
- Meets or Exceeds U.S. Coast Guard Requirements

Cockpit

- 4 Padded Ergo Dynamic Seats and Composite Frames
- Fixed Helm Power Pedestal
- 2 Air Ride Pedestals
- 4 Seat Bases (1800 T)
- 6 Seat Bases (1800 SC, DC, 2000)
- Elevated Bow Casting Deck w/Lockable Storage
- Elevated Aft Fishing Position w/Storage
- Port & Starboard 10 Rod Storage (2000)
- Port & Starboard 75" Accessory Storage (1800 T, SC, DC)
- Port & Starboard Console Storage (1800 DC, 2000)
- Starboard Console Storage (1800 SC)
- Dual Battery Storage Compartment
- Bow Panel w/Plug, Tilt Switch & Aerator Switch
- Stern Side Panel Storage (2000)
- 2 On-Deck Bait Systems (2000)
- 1 On-Deck Bait System (1800 T, SC, DC)
- Aluminum Deck Lids
- Lockable Bow Dry Storage
- Deluxe Side Panels w/Tee Kick
- Insulated Live Well Lids

Dash & Console

- New NeoGen® Gauge Cluster and AIS Dash (1800 SC, DC, 2000)
- Deluxe Color Coordinated Instrument Panel (1800 T)
- Deluxe Steering Wheel (1800 SC, DC, 2000)
- Large Walk-Thru Radius Windshield (2000)
- Large Deluxe Port Glove Box (1800 DC, 2000)
- Speedometer
- Tachometer
- Voltmeter
- Fuel Gauge
- Trim Gauge (1800 SC, DC, 2000)
- Electronics Storage Box (1800 T)
- Shaded Plexiglass Windscreen (1800 SC, DC)
- Helm
- Power Ports (1800 T, SC, DC)
- 2 Power Ports - Bow & Dash (2000)
- Adjustable Antenna

- 50w AM/FM Cassette Stereo
- 4 Marine Grade Speakers
- McGill Single Line Euri Switches
- Bow & Stern Courtesy Lights

Plumbing

- Illuminated 21 gal. Aft Aerated Live Well
- Illuminated 50 gal. Bow Aerated Live Well (2000)
- Illuminated 40 gal. Bow Aerated Live Well (1800 T, SC, DC)
- Bow & Stern 2 gal. Aerated Bait Wells (2000)
- Bow 2 Gallon Aerated Bait Well (1800 T, SC, DC)
- Rotocast Live Wells w/Radius Corners, Tinned Aerated & Recirculated w/Flow-Rite Live Well System
- Automatic 750 GPH Bilge Pump
- Live Well Flush Out Drain

Electrical

- Removable Bow Light w/Courtesy Light
- Non-Glare Removable Stern Light
- Circuit Breakers
- 3 Battery Holders
- 12/24V Bow Heavy Duty Recept and Plug w/Charger Plug
- 12/24V Aft & Bow Heavy Duty Recept and Plug w/Charger Plug (1800 T)
- 10 amp Trolling Motor Battery Charging System
- Dual Battery Indicator Gauge
- Bow Electronic Command Center

Mechanical

- No Feedback Tilt Steering (1800, SC, DC, 2000)

Trailer Features

- EZ Loader Trailer
- Color Coordinated Custom Welded Stealer Frame
- Swivel Tongue Jack
- Waterproof Lights
- Winch Strap
- Carpeted Bunks
- Goodyear Radial Tires
- Sure Lube Bearing Protection
- MSMA Certified
- Canadian Lighting Compliant
- Two Year Limited Warranty

Optional Features

- Hydraulic Steering (1800, SC, DC, 2000)
- Fish Package: Lowrance® X-65 Depth Finder
- MotorGuide® 750-50" Trolling Motor w/Gator Mount (1800)
- MotorGuide® 750-60" Trolling Motor w/Gator Mount (2000)
- Marring Cover
- Bow Terrace Cover (1800 DC, 2000)
- Side Curtain Set (1800 DC, 2000)
- Drop Curtain (1800 DC, 2000)
- Aft Curtain Set (1800 DC, 2000)
- Deluxe Trailer Exchange
- Bimini Top (1800 T, SC)
- Large Walk-Thru Radius Windshield (1800 DC)
- Stand Up Top (1800 DC, 2000)
- Outboard Motor Support

The Islander Series

YOU HAVE ALL THE ROOM TO RUN. NOW YOU HAVE ALL THE ROOM TO FISH.

We dare you to tackle the big water of the Great Lakes in one of the most rugged boats in the Starcraft fleet. The Islander Series has a long history as a stable and safe deep water boat. For 2000, we've given you everything you'll need, including increased fishable space, deluxe cockpit bolster pads, and on top of the engine box, we've integrated a cutting board so you can cut your chum or clean your catch. To make trolling with downriggers and four lines in the water easier, we've moved the step to the cuddy cabin up and added seven more inches between the two front chairs so you can easily get in and out of the helm seat when you hear the

zip of your reel. And after your arms feel like limp sticks from hours of battling fish, we've even made it easier to make that line turn towards shore. Just kick down the new helm folding step and enjoy a better view that gives you more control when docking. With all its fishing features, you'd have to be a steelhead not to want an Islander.

1. **New cutting board:** On engine cover which gives you a place to cut bait.

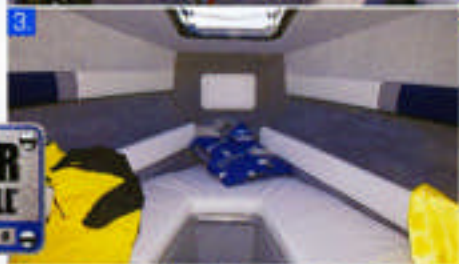

2. **Automotive style FlexGen® cluster:** Features easier-to-read instrumentation and new helm storage pocket.

3. **V-berth cabin:** Features plenty of head room and can comfortably accommodate 4 adults.

4. **Rod storage box:** Added new restraining lip to help keep things in place.

5. **Translucent escape hatch:** Provides easy access to the top deck and added light in the V-berth.

6. **New rod holders:** Integrated into the engine box to provide convenient storage while running.

The Expedition Center Console Series

FIGHT THE FISH MORE. BATTLE THE SEAS LESS.

In an ocean that's never predictable, you better make sure your boat is. End of story. To build the kind of hull that slices through seas and carries you out 30 miles to the trophy fish, we started with an integrated all-composite fiberglass stringer construction and designed an aggressive 4-foot cockpit depth that helps keep you inside the boat, even when Mother Nature wants to toss you out. And to make sure you don't get stranded once you're out there, we've engineered a bonded electrical system that won't fail even in the most wicked storm. On the inside, we've redesigned the cockpit of our bigger 2280 to give you more fishable space behind the helm by moving the cooler up under the bow cushion and added a larger easy-access bait well. Maybe that's why so many off-shore professionals and salt water enthusiasts head out in an Expedition.

1. **Fiberglass center console:** With convenient side and rear access.
2. **Open rod storage:** Provides plenty of storage for big water tackle.
3. **Optional twin 150 HP engines:** Feature hydraulic steering and counter rotating props for increased stability.
4. **Bow fish box:** Insulated and roomy enough to hold your limit.

Standard Features

Hull Construction

- Non-Skid Deck
- Composite Integrated Stringer
- Welded Stainless Steel Bow Rails
- Stainless Steel Bow & Transom Eyes
- Vinyl Rub Rail
- Anchor Locker
- Battery Storage
- Stainless Steel Hardware
- Cockpit Lighting
- Bow Platform w/Large Insulated Fish Well & 2 Insulated Storage Compartments
- Non-Slip Self-Bailing Fiberglass Liner

Cockpit

- Fiberglass Center Console w/Side & Rear Access
- Contoured Plexi-Glass Windshield
- Stainless Steel Grab Rails
- Forward Console Seat w/Porta Potty (2080)
- Stainless Steering Wheel w/Padded Grip
- Deck Fitting/Fuel Fil
- Bow Cleats, Stainless Steel
- Navigation Lights
- Automatic/Manual 1200 GPH Bilge Pump
- Concealed Horn
- Dual Battery Crossover Switch
- Dual Battery Trays
- 4 Deck Mount Cup Holders
- Lockable Electronics Compartment
- Chart Table
- Dual Lining Post w/4 Rod Holders & 40 qt. Cooler (2080)
- Large Bait Wells with Radius Corners
- Stem Cleats of 5/8" wh/line Pipes
- Antenna Rigging Tube/Console to Gunwale
- Side Rod Storage (8)
- No Feed Back (Back & Forward) Steering up to 175 h.p.
- Hydraulic Steering on 200 h.p. and Above and Twin Engine Installation (2080)
- 2 Insulated Aft Bait Wells/Fish Boxes
- Full Length Padded Gunwale Bicolor
- 12 volt Power Point
- 72 Quart Cooler w/Cushion (2080)
- Fuel Gauge

- Speedometer
- Tachometer
- Voltmeter
- Compass
- Trip Gauge
- Weather Resistant Switches and Controls
- Grounded Circuit Breaker Protection
- Bonded Electrical System
- Raw Water Washdown

Optional Features

- T-Top w/Rod Holders & w/Spreaders Lights
- Deluxe T-Top w/Outriggers & Spreaders Lights
- Bow Dodger
- Console Cover (Not Available w/T-Top or Hard Top)
- Trim Tabs
- Remote Spot Light
- AM/FM Cassette w/2 Speakers
- Bow Cushion
- Boarding Ladder w/Platform
- Painted Trailer
- Galvanized Trailer
- Roller Trailer

The Expedition Walk-Around Series

OFF-SHORE ACCOMMODATIONS FOR THE WHOLE FAMILY.

Along with the salty sea air, you can smell it: the blues are running today. Luckily, you've got what it takes to keep up with them day and night thanks to the Expedition's V-berth cuddy cabin. Built just as tough as our popular off-shore Expedition Center Console, the Walk-Around is ideal for the kind of fishing expeditions that take you days (and nights) from shore. So you can work the fish all the way around the boat safely, we've integrated deep, wide aisles along the outside of the forward deck. And to clean up after the most grueling sea battles, we've included a raw water wash down and on the 2490 a fresh water washdown. There's also a 148 quart in-floor fish box that'll hold your limit of fish. So when it comes to an off-shore adventure, go with an Expedition.

- 1. Command helm:** Features courtesy lights, stainless steel steering wheel with padded grip and rotocast captain's chair.
- 2. Bimini®SM top:** Features color-matched top and boot with stainless steel frame for increased durability and protection from the elements.
- 3. Rear deck:** Features stainless steel rod holders, stern cleats with Hawes pipes to eliminate any on-deck obstructions, and an insulated bait well with composite cutting board lid.
- 4. Optional remote spotlight:** Increases nighttime visibility.
- 5. Fish box and bait well:** Insulated in-floor 148 qt. fish box provides plenty of room for your catch while the rear bait wells feature easy access.
- 6. V-berth cabin:** Features wrap-around backrest and combing pads, overhead lighting, and a lockable cabin door.
- 7. Bolt-in tackle storage:** Provides convenient storage for tackle while running.
- 8. The optional deluxe hard top with rocket launchers and spreader lights:** Provides protection from the elements and convenient running storage for your rods as well as cockpit lighting.

Standard Features

Hull Construction

Integrated Composite Stringer System
Non-Skid Self-Bailing Liner
Battery Hold Down Tray
Rope/Anchor Line Locker w/ Hatch
Port Holes
Deck Fitting Fuel Fill
Automatic & Manual Bilge Pump
Hawse Poles

The Superfisherman Series

ONE TOURNAMENT FISHING BOAT BUILT FAMILY STYLE.

At Starcraft, we walk the line of tournament fishing boat precision and all-out family fun to make everybody scream with joy. With the 2000 Superfisherman, you get it all. With an optional Family Package that includes a back-to-back sleeper, bow cushions and a swimming ladder, your wife and kids can enjoy the sun, while its optional Fishing Package, with depth finder and trolling motor, will help you fill that freezer. And to protect your catch from the hot sun, we've added new insulated live well lids that help keep the temperature down, and your catch alive. The Superfisherman also has more storage area than most fishing boats. Finally, to make sure your family is carried around the lake comfortably, we've added luxurious new bow bolster pads. If you're looking to buy a boat that'll make everyone in the family scream, look no further than the Superfisherman.

- Deluxe NexGen® dash console:** Features easy-to-read instrumentation and a convenient fish locator step, spring loaded radio cover and sleek reduced windshield that increases visibility.
- Illuminated live well:** Top aerated and features a new insulated lid to help keep catch healthy.
- Bow command center:** Provides easy access to all controls while you're fishing, along with the standard 24 volt trolling motor plug.
- Red box storage:** Features stiffer doors with stronger, reinforced corners and easy top loading capability.
- Built-in starboard bow tackle storage:** Provides convenient storage for tackle while running.

Standard Features

Hull Construction

- Power-Trac Hull with Torsion Beam Construction
- Stainless Steel Bow & Stern Eyes
- 4 Mooring Cleats
- Double Vented Fuel Tanks (196)
- Internally Vented Fuel Fill
- Stepped Transom for Kicker Motor
- 3/4", 7-Ply Pressure Treated Floor & Deck
- Marine Grade 15 oz. Carpet
- Marine Grade UV Stable Vinyl
- Marine Grade 5052 Aluminum
- Vinyl Rub Rail
- Limited Lifetime Deck Warranty
- 10 Year Pro-Rated Hull Warranty
- Meets or Exceeds US Coast Guard Requirements

The Fishmaster Series

FOR THOSE WITH A LARGE FREEZER CHEST WAITING TO BE FILLED.

If you're looking to get into big water, you just might be surprised what you find here. Introducing the completely redesigned Starcraft Fishmaster. From bow to stern, you'll fish an all-new boat for 2000. On our flagship 196, we've made it even more fishable by increasing its cockpit depth while still integrating our toe kicks, providing you with more leverage when you're hauling in monster coho. For those of you fishing the Great Lakes and other deep water, we've made it easier to access your downriggers and shortened the bow casting deck, giving you more cockpit room to work the fish. We've even moved the aft minnow bucket to the center of the stern so you can fish off the corners. And on the 196, we've increased under floor storage so you can tote more gear and stay a little longer. Whether you're fishing 100 feet or 10 feet, the Fishmaster won't let you down.

1. **Deluxe NextGen® dash console:** Features easy-to-read instrumentation, a convenient fish locator or GPS slot, spring loaded radio cover and sleek radiused windshield that increases visibility.
2. **Large motorwell:** In conjunction with increased interior depth, it enables you to tackle bigger waters and remain drier due to the 25" transom on the 196.
3. **Open rod storage and ergonomic toe kicks:** Rod storage provides easy access to rods while fishing and full-length toe kicks make pulling in the fish easier.
4. **New ProForm fishing seats with composite frames:** Redesigned for better ergonomics and increased durability.
5. **New in-floor storage (196 only):** Provides increased and easier access while running.

Standard Features

Hull Construction

Power-Trac Hull with Torsion Beam Construction

The Starfire Series

JUST ONE MORE REASON TO GET OUT ON THE WATER. MAKE THAT 13.

1. **Deluxe ABS dash console:** Features easy-to-read instrumentation and sleek reduced windshield to increase visibility.
2. **New dual rod boxes:** Feature large lockable storage to make transporting your rods easier and hassle-free, and new more durable aluminum doors.
3. **Top serrated roto-cast low live well:** Increases stern storage and the radiused corners help to keep the catch healthy.
4. **Fold-down bench seat:** Roomy optional design feature is great for the family.

For 2000, we've increased our line of Starfires to include three new models that offer you and your family true fishing and pleasure boating convertibility for the ultimate experience on the water. To provide more functional space in the boat, we've incorporated a notched bow on

the LE models to make riding in the Starfire more comfortable, and safer for the whole family. With all these options, plus our exclusive Power-Trac Hull[®], you can be sure to buy a boat that's perfect for you.

Inside the cockpit, we've equipped it with an automotive style dash console with easy-to-read instrumentation. Up in the bow and back in the stern, we've integrated flush decks so you have more room to fight the fish. And finally, to build a boat as functional as it is good looking, we've increased storage in the stern, moved the live well to the bow and maximized the fishable space in the cockpit. Did we mention there's a new 19 foot model? With so many great Starfires to choose from, isn't it about time you got out on the water?

Optional Features

The Starcater Series

GOING FOR TROPHY BASS YOU'LL NEED A BOAT WITH ATTITUDE.

Eight storage bays and two live wells are enough to make any fisherman happy. That's why we go one step further to ensure those storage bays are enormous and the live wells are top aerated. It doesn't get any better than this. For 2000, we've also increased the strength and durability of the ABS dash console and added new carpet to make this the best looking Starcater to date. We've also designed it to help you catch more fish. With a dual console and center bow rod box and plenty of dry storage under the bench seat, you'll agree the 1860 is a serious bass fisherman's dream.

1. **New and improved ABS dash console with NexGen® cluster:** More durable and features easy-to-read instrumentation. A Lowrance® fish locator is also standard.
2. **All casting deck with New Proform fishing seats with composite frames:** Redesigned for better ergonomics and increased durability.
3. **Locking rod box:** Large lockable storage to make transporting your rods easy and hassle-free.
4. **Large storage compartment:** One of eight in the boat that provide plenty of room to stow your gear.
5. **Helm and buddy bench with dry storage:** Provides ample room for larger items.

Standard Features

Hull Construction

Power-Trac Hull with Torsion Beam Construction
 All Welded Construction
 Stainless Steel Bow & Stern Eyes
 Aluminum Rub Rail
 Aluminum Lids
 4 Mooring Cleats
 Built-in Fuel Tank
 Internally Vented Fuel Fill
 3/4", 7-Ply Pressure Treated Floor & Deck
 Marine Grade 16 oz. Carpet
 Marine Grade 5052 Aluminum
 Limited Lifetime Deck Warranty
 10 Year Pro-Rated Hull Warranty on Welds
 Meets or Exceeds US Coast Guard Requirements

Baystar
1860

There's strength in our construction.

WHEN IT COMES TO TOUGHNESS, WE PUT IT ALL TOGETHER.

And the result? A boat that reacts to the water rather than works against it. A boat with instinct. Ask anybody about the feeling they get from knocking down waves in a glass boat from Starcraft. It's addictive. You'll begin to wish everything you owned felt this good. This sturdy. It's no secret. Just quality craftsmanship. And here's how we do it.

The 2000 line-up of fiberglass boats has been

specially designed with 24-ounce bi-axial woven fiberglass instead of 18-ounce woven roving like our competitors. It's the result of our six-inch overlap which increases strength versus their typical one-inch overlap. This increases its reliability and durability for pounding waves. We start by building all our boats around steel-tubed frame molds to increase strength and decrease

Hand-Laid Fiberglass Construction Process

Spraycore[®] barrier coat, with 80 mil thickness, is applied to the sidewalls providing more strength and rigidity with less weight, eliminating hot spots during lamination for an improved finish (not done by most competitors).

Premium, high gloss gelcoat, with 20 mil thickness, is sprayed to provide maximum blister resistance and UV protection.

Second layer of fiberglass woven roving applied along with a balsa core for strength and less weight to support high-stress areas.

First layer of multidirectional hand rolled fiberglass called the "skin coat" is applied.

Bi-axial fiberglass is applied to high stress areas.

Hand laid fiberglass at all chine and strike lines.

A full fiberglass liner for quicker and easier clean up or maintenance.

Injected flotation foam.

The warranty is performed by a
 bonded & licensed certified
 contractor. We do not recommend
 opening your boat in this manner.

the likelihood of the boat becoming warped or disfigured. And to assemble the deck and hull, we use a combination of a bonding agent and through-bolt construction.

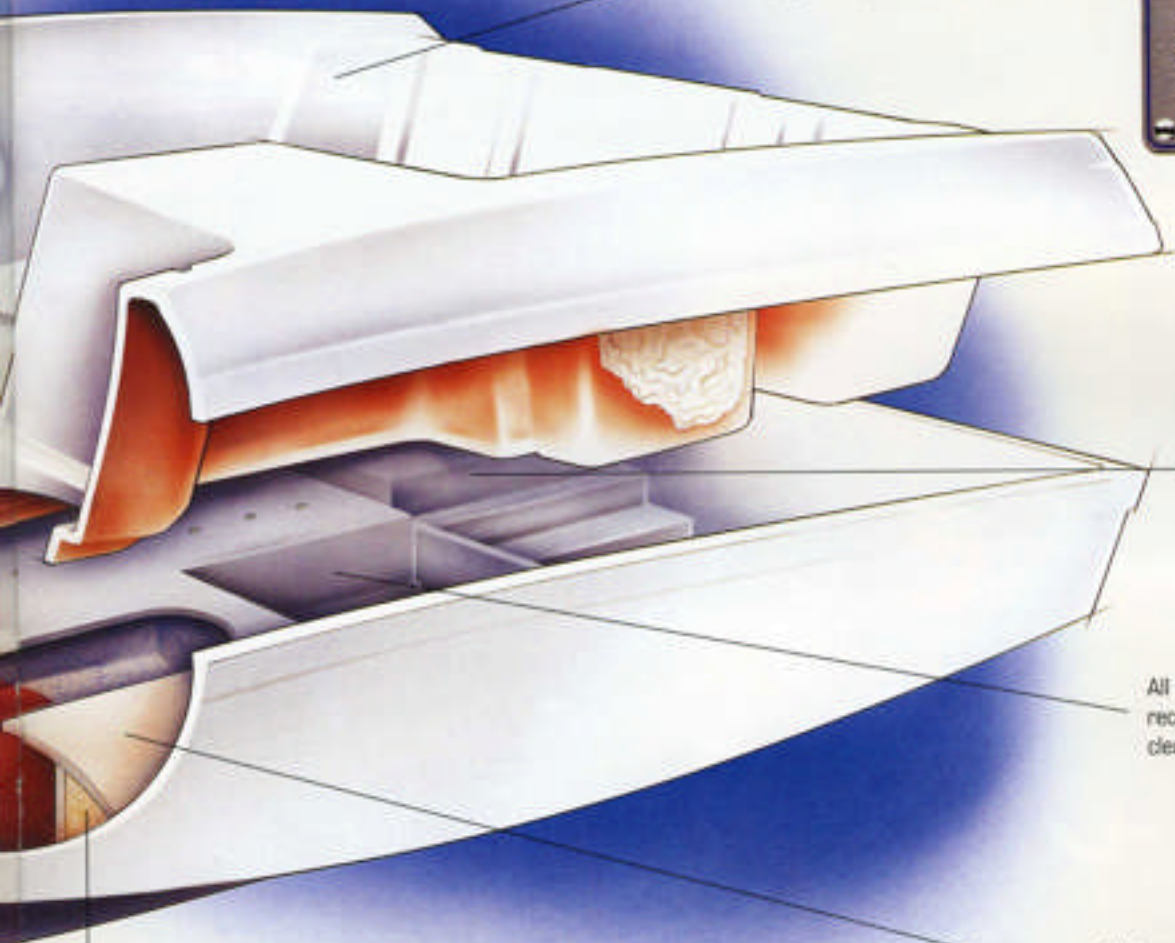

At Starcraft, we've studied the water for nearly a century. We understand how to make a glass boat perform in all kinds of conditions. So whether you want to chase fish through brackish water, or tackle the weekend on a wakeboard, you can be sure you're in a glass boat that's been engineered to take a beating. After all, we put it together.

One piece roto-cast bench seat for lower maintenance and easier access to engine compartment.

WARRANTIES

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up that level of quality construction. Starcraft warrants each fiberglass hull for 5 years. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

Any wood is below deck and fully encapsulated in fiberglass to lock out moisture.

All interior storage compartments receive gelcoat for a smooth, clean appearance.

All floors are joined to the hull with 24 oz. fiberglass, resin coated then fiberglass coated.

Foam is injected, not poured, between the hull and the deck, which fills all air pockets to prevent water from leaking in, increases hull strength and decreases noise and vibration.

The road to happiness

IS COVERED WITH WATER.

This is it. You either join the club and start enjoying life at 50 mph with a nice tan. Or you tell yourself you'll get a boat next year, just like you did last year. Decide for yourself, but think quickly. Even as you read this, people are firing up their engines and heading over to the sand bar to welcome another member to the lake. Can you hear it?

It's the sound of the wind as it scoots past your

eers telling you it's okay not to worry. Reminding you there's a lot of living to do between Friday and Monday. It's an invitation to the open water and a journey that unwinds into the horizon. One thing's for sure, you can never go back. When the distinctive rhythm of the Starcraft Silent Choice Thru Hull Exhaust (optional) beats against the air, it calls to all within earshot. And lets them know you've made it. You're finally here. Spend a

Saturday afternoon at the sand bar, and you'll clock out of your nine to five life forever. And after you say your goodbyes to the starched shirts of the world, you can turn to the water and walk proudly toward the lake sporting an old pair of flip-flops and a newly liberated spirit. What more incentive could you possibly need?

The Nexstar 1910 LXSG

TO ALL YOU POWER-HUNGRY OVERACHIEVERS OUT THERE: IT'S FEEDING TIME.

Nexstar represents a radical change that's sweeping through Starcraft's Fiberglass division. In an effort to build a glass boat that performs more like a gummy race car, we've engineered our new fiberglass line to improve aerodynamics and maximize horsepower. The result? A sleeker boat with a lower profile that moves through the water like a barracuda. We've also engineered this beast with a Wide Trac Hull. At 8'6", it's the widest 19 footer in the industry, which not only increases stability at high speeds and improves cornering characteristics, but also increases the cockpit space. Behind the wheel, power hungry drivers will be pleased with the 350 MPI Bravo 1 MerCruiser engine that's part of our Mach II package. Inside the cockpit, you'll find deluxe standard equipment that are options on most boats, like a Sunbrella® top, an AMFM CD player with a detachable face, and an in-dash digital depth finder. Plus a low maintenance fiberglass liner and a high-tech, wraparound instrument console that more closely resembles a menacing F-16 than a speedboat. While it stands as the new platform for fiberglass boats from Starcraft, you can be sure, the same strength and spirit have been poured into every inch of the Nexstar, because we wouldn't have it any other way.

- 1. Aircraft-style wraparound instrumentation:** Features high-tech, easy-to-read gauges.
- 2. Hinged lid in-floor storage:** Provides plenty of room to store your wakeboards, kneeboards and skis.
- 3. Mach II performance package:** Includes 350 MPI Bravo 1 MerCruiser engine, deluxe sport steering wheel, enhanced Mach II graphics, stainless steel propeller and Silent Choice with stainless steel thru hull side exhaust.
- 4/5. Nexstar platform:** The new lower profile design represents the future of Starcraft in the glass market.
- 6. Furniture and upholstery:** Molded into the deck for increased style and functionality.

2210-2010 LX & LXS

ONE STYLISH BOAT THAT PREFERS THE TANGO.

Who said the thrill was gone? Maybe you just haven't found the right boat. Let us show you around the subtle and luxurious 2210/2010 LX & LXS series. With brand new interior layouts and exterior graphics, these boats are marvelous rockets just waiting to blast off. For 2000, we've re-engineered the sunpads for more comfortable tanning sessions and redesigned the cockpit for an even more spacious (not to mention functional) interior. Don't let the 22-footer's entertainment center and sink fool you. With a 7.4 liter engine, it's got plenty of zip and will be sure to please the most discriminating drivers. And with a carefully designed hull that produces a low wake, even the skiing enthusiasts of the family will love life in the 2210/2010 LX & LXS series.

1. **Deluxe color coordinated console with sport gauge instrumentation:** Features high-tech, easy-to-read instrumentation.
2. **Aft storage under rear roto-cast bench:** Features plenty of dry storage.
3. **Integrated side storage:** Helps keep the cockpit uncluttered.

The 2212-2012 LX & LXS Cuddy Cabin Series

FOR FAST DAYS, SLOW NIGHTS, AND EVERYTHING IN BETWEEN.

These inboard cuddy cabin cruisers are ideal for longer days (and nights) on some of the bigger lakes around the country. The roomy V-berth features an overnight sleeper while the cockpit is equipped with an entertainment center with a sink (2212 LX), a 25 quart cooler and a spacious Porta Potti® so you don't have to return to the dock until you're ready. For 2000, we've made some enhancements to the interior color scheme and exterior graphics to improve its style and help ensure you're the envy of the lake. And with an aft convertible sundeck and luxurious appointments as well as a smooth and responsive throttle for the ultimate in driver control, we're sure you'll have a little fun getting the boat up and out of the water.

The 1800 LX & LXS Series

RIP ACROSS THE WATER IN STYLE.

Whether you buy it for the spirited 4.3 liter engine, the aerodynamic wraparound windshield, or the hours of fun you'll have zipping across the lake, the 1800 LX and LXS series is the ideal watercraft for the whole family. For 2000, we've modified the hull to improve its performance when pulling skiers, whipping tubers or thrashing wakeboarders. And it's more than a powerful tow boat. The sundecks are comfortable, the storage bays are easily accessible, the in-floor ski storage now has a hinged door, and the list of standard features is longer than your tow rope. Whether this is your first runabout or just the latest in a long line of Starcrafts, the 1800 LX & LXS series is a short cut to one long summer of fun.

1. **Back-to-back seating:** Adjusts to form an on-deck tanning bed with deluxe foam and upholstery.
2. **Portside dash console:** Features a lockable glovebox and integrated cup holder for added convenience.
3. **Aircraft-style wraparound instrumentation:** Features high-tech, easy-to-read instrumentation.

GT Series

EVERYONE'S FAVORITE ACTION ADVENTURE SERIES.

A favorite among the few who aren't afraid to look out over the lake and claim the water as their own. Starcraft engineers tweaked the GT to near perfection for 2000. The new exterior graphics and interior color schemes make this redesigned GT the envy of boat lovers everywhere. The padded aft sundeck and open bow layouts give you plenty of room to enjoy the sun without sacrificing an iota of performance. In addition, our 2012 model features a roomy V-Berth. Finally, the GT's hull produces a wake that's ideal for both skiing and wakeboarding so you can make some noise out on the water.

1. **Aircraft-style wraparound instrumentation:** Features high-tech, easy-to-read gauges.
2. **In-floor ski storage:** Plenty of room to bring along all your toys.
3. **Bow cushions:** Feature luxurious upholstery and high-density foam for better support and accented with color coordinated stitching.
4. **Roto-cast bucket seats:** Provide the ultimate in comfort and style.

Standard Features

Hull Construction

Stainless Steel Bow & Stern Eyes
Stainless Steel Bow Rails (Not Available on 1710)
Bow Grab Handles (1710)
Six Tow Rings (1710, 1810, 2010, 2012, 2210)
3 Mooring Cleats
Internally Vented Fuel Fill
Color Coordinated Marine Grade 18 oz. Carpet (1710, 2012)
UV Resistant Marine Grade Vinyl
Interlocking Stringer System
Barnier Coat in Hull Sides & Deck
All Vinyl Rub Rail
Full Fiberglass Liner (1800, 1810, 2010, 2012)
Thru-Bolted Deck to Hull
Five Year Fiberglass Hull Warranty
Meets or Exceeds US Coast Guard Requirements
NADA Certified

The 1700 and Fish & Ski Series
GO RUNABOUT OR FISH & SKI.

That's the beauty of Starcraft. You have choices when it comes to buying a boat. With the Fish & Ski Series, you get everything you need to spend an afternoon with a pole in your hand, while the 1700 Runabout series is an affordable line of skiing boats designed to get you screaming across the lake in no time. On the Fish & Ski, you'll find a removable fishing seat in the bow (1B09), a low maintenance deck that's easy to clean and a top aerated live well so you can seriously pursue the fish. But with in-floor ski storage, an optional ski tow bar and the performance of a Mercury engine, you'll also find it easily converts to a zippy ski boat. Over on our 1700 Runabout series, you'll find adjustable back-to-back seats that lay down for a natural tanning bed, plenty of storage and a new high-tech dash console so you can take the family out in style. Take your pick. Either way, you'll enjoy your decision.

1. **Bow cushions:** Removable cushions accommodate bow fishing chair for easy convertibility from fish to ski.
2. **Back-to-back seating:** Adjusts to form an on-deck tanning bed with high-density foam and upholstery.
3. **Aircraft-style wraparound instrumentation:** Features high-tech, easy-to-read gauges.
4. **In-floor ski storage:** Features plenty of room to stow wakeboards and skis.
5. **New dash glove box console:** Features stronger, more durable lid and plenty of space to stow your valuables while you're behind the boat skiing or tubing.

Standard Features

Hull Construction

- Extended Running Surface (1710)
- Stainless Steel Bow & Stern Eyes
- Box Grab Handles (1710)
- 3-Mooring Cleats
- Double Vented Fuel Tank (1700, 1710)
- Internally Vented Fuel Fill
- Sk. Tow Ring (1710)
- Fuel Tank Access Panel
- Marine Grade 16 oz. Carpet (1700, 1709, 1710)
- Marine Grade Vinyl
- Interlocking Stringer System
- All Vinyl Rub Rail
- Full Fiberglass Liner (1809)
- Thru-Bolted Deck to Hull
- Five Year Fiberglass Hull Warranty

The Aurora Series

A DI-HEDRAL HULL. AN INVINCIBLE SPIRIT.
AND THE FAMILY UP FOR THE WEEKEND.

That's why you need a deck that accommodates 13 people, a large change room with Porta Potti[®], and enough storage space to keep you out on the water for hours. That's why families love the Aurora. This year, they'll love it even more. With our new On-demand[®] pressurized sink, all you do is turn the faucet and forget about pumping. It works just like your kitchen sink at home. And with its transom shower with faucet control, cleaning up has never been easier. Not to mention it helps you keep the inside of your boat cleaner since you won't be dragging sand and mud inside. Whatever you plan for the water, the Aurora has a feature for it. Skiing, tubing, cruising. We've equipped it with more standard features than any other boat on the market. We understand just how much your family needs the Aurora. That's why we built the water's ultimate one with you in mind.

1. **On-Demand[®] portside sink:** Pressurized water system just like home.
2. **Alt "L" conversation area with removable table:** Soft/rich upholstery increases luxury, while furniture has been ergonomically designed to maximize space on the deck.
3. **Insulated storage with drain:** Integrated into swim platform and features convenient stern cooler or storage.
4. **48 quart cooler:** Provides convenient access to refreshments.
5. **Sport instrumentation:** Features high-tech, easy-to-read gauges.
6. **Alt underseat storage:** Dry, roomy storage bays for life vests, anchors and other gear.
7. **New standard alt transom shower:** Provides quick and convenient access to shower nozzle.

Storage

Every wake tells a story.

ONE STRONG FAMILY. ONE LONG LINE OF PONTOONS.

In 97 years, Starcraft has grown up on the water. Learned to fish and ski. Discovered a world beyond the stumpfields. And became an innovator in the boating industry. So, whether you're looking for a pontoon to help guide you through the currents, eddies and crannies of inland waters, or one to just get you down the channel and onto the lake, you'll have confidence in a pontoon built with nearly a century of ingenuity.

You see, when it comes to designing and building a pontoon you and your family will enjoy, we're always looking for ways to make them better. In fact, some say our engineers are a bit obsessive when it comes to the finer details of building a highly functional pontoon. Even when it means integrating unique features in places you can't see, like below the deck. For example, you'll find our decks are secured with nine elevator bolts along each seam. Compared to the others, who've been known to use only five or six, our deck is more stable. Something we

Carpet

Holes are cut in the deck before the carpet is laid, to ensure a clean deck under the carpet and help prevent carpet break down. We also use roll-on glue for complete adhesion, as opposed to spray-on glue used by competitors which does not seal as well.

Fitted Double Rub Rail

The plywood deck fits into the lip of the rub rail. It helps keep the deck dry, as well as secures the carpet and protects and reinforces the entire deck, preventing any sagging at the deck edges when boaters enter or exit the pontoon.

Trouble-Free Beds

Our beds are the only user-friendly beds in the industry. Unlike competitors' models, our beds are designed so you can easily open them with one hand. In addition, when you want to get a life vest or towel out of the storage compartment, the bed cushion stays open so you don't have to fumble around trying to hold the cushion with one hand while searching with the other. As far as construction goes, each bed is made with one piece, rather than many, and is roto-cast with drain holes to eliminate the risk of water damage. The bed, like all seating furniture, is made of marine grade foam and UV resistant marine vinyl upholstery, and is channeled to allow air to get in and under seats so they don't mildew. The entire piece is then covered and completely sealed, not just dipped or stained. Finally, all furniture is assembled off the boat to eliminate the risk of any damage.

Elevated Fencing

The fencing has been raised 1/8" to allow water to drain, minimizing the risk of mildew and allowing the deck to dry in a shorter time frame.

Indirect Floor Lighting

To illuminate the floor for nighttime rides, lighting has been integrated into the furniture on all Elite models.

Insulated Fence Panels

To eliminate any rattles from the fencing or rails at running speeds, foam tape is applied wherever the aluminum fencing attaches to the metal frame.

think you'll appreciate after years of pleasure or fishing. And above the deck, we've taken the time to fasten our doors with screws rather than pop rivets. We know you may not be able to appreciate this until you've opened and closed the gate a few hundred thousand times, but that's okay. We're just bound and determined to build the best pontoons on the water. That's why we equip them with more standard features than anyone else on the market. After 97 years on the water, we know what our customers expect when it comes to the kind of equipment they'll need to help them get away from it all on a pontoon.

Wood vs. Composite vs. Aluminum

7-Ply Pressure Treated Plywood

- Insulates against heat
- Costs less and still carries the same lifetime warranty
- Quieter on the open water
- Lighter weight than most composite materials to improve speed and fuel economy
- Provides necessary flexibility to minimize wear and tear on components

Composite

- More expensive than plywood with same warranty as wood
- Made with space-age synthetics
- Won't rot or retain water
- Won't warp, delaminate or peel
- Our optional space-age (optional) composite will not permanently deform over time like some materials used by the competitor

Aluminum

- Very HOT in the HOT HOT sun
- Increase carpet wear and tear
- Is prone to cracks, rattle, and leaks causing water to seep into the deck and carpet creating mildew
- Aluminum is a thinner material creating a weaker platform for optional accessories attached to the floor like a grill compared to wood or composite

Nylon Lock Nuts

Used in place of regular star washers, these nylon nuts heat up and seal to the bolt for a stronger bond.

WaterBoot®

All tables and fishing seats are supported below the deck with a metal bracket. A WaterBoot® surrounds the bracket and attaches to the decking so water can't seep into the floor, keeping the deck dry.

Deck Cap with Radius Corners

For a smoother exterior appearance, we've replaced the black corner bumpers on our Classic and Starfish models, 20' and above, with stronger-radius caps.

LockOut® Sealant Tape

To eliminate risk of dry rot or warping, special sealant tape is placed on every Z-bar cross member to completely seal the decking. Unlike silicone, which reacts poorly with salt water, LockOut® Sealant Tape provides years of trouble-free service by maintaining a dry deck.

Z-bar Cross Member

The pontoon is securely fastened to a heavy-duty, extruded Z-bar cross member support system, providing more strength and structural stability than conventional hat channels.

Aluminum Under Deck Liner

For smoother, more efficient performance for our I/O models, the entire length of the boat is lined (optional on outboard models). This keeps water from splashing against the cross members and eliminates the "surging" sensation that's created. The liner starts behind the splash fins on the tubes, allowing the pontoon to cruise effortlessly at higher speeds.

Extruded Aluminum Molding

Strong moldings act as spray deflectors, as well as provide additional support for the pontoon.

Tubes

Our pressure checked tubes are constructed with two or three baffles (sections), so if a part of the tube is punctured, the entire pontoon won't sink. Each baffle is connected with a 3/4" double wall overlap that's stronger than a conventional butt weld.

Full-Length Keel

Protects the tube, as well as provides steering stability when running.

WARRANTIES

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up that level of quality construction. Starcraft pontoons carry a lifetime warranty on the deck, tubes, and brasses. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.

NMMA Certification

All pontoons are NMMA certified, which means that all wiring is sealed meeting standards similar to the automotive industry and is secured every 18 inches. Additionally, any metal that comes in contact with the gas tank is sealed.

The Starfish Series

NOW THERE'S AN AFFORDABLE WAY TO SPOIL THE FAMILY.

You've got what you need to fish and cruise the lake in style. While the Starfish series may be the most affordable line of pontoons in our fleet, it's built just as strong and with luxurious amenities. We insist on appointing it with all the finest upholsteries and deck furniture. After all, at Starcraft, quality is never an option. For 2000, we've brightened up the interior color schemes to give it a look that just doesn't compare to the competition. On the 240, we added a second live well in the rear to make fishing more convenient at all four fishing seats. On both the 200 and 180, we redesigned the deck layouts to maximize the amount of fishable space. After all, when you buy a pontoon, you're looking for a little freedom to roam around. Go ahead and live the dream.

1. **Color coordinated ABS dash and instrumentation:** Easy-to-read gauges with flush-mount AM/FM cassette stereo.
2. **New side rod storage:** Provides convenient storage while running.
- 3/4. **Bow casting deck:** Two bow casting chairs with integrated cup holders and rod holders.
5. **Under seat storage:** Roomy enough for water guns and other aqua gear.

Standard Features

Hull Construction

- Stainless Steel Bow & Stern Eyes
- 2 Mooring Cleats
- Thru-Bolted Floors
- 23 Gallon Built-in Fuel Tank (240)
- 12 Gallon Portable Fuel Tank (180, 200)
- Internally Venting Fuel Filter (240)
- Battery Storage
- 3/4" 7-Ply Pressure Treated Floor & Deck
- 16 oz. Marine Grade Carpet
- Marine Grade Vinyl
- Marine Grade 3052 Aluminum
- Anodized Rails
- Raised Escaper Mount Fencing
- Radiused Corners (200, 240)
- Saltwater Resistant Fasteners
- Limited Lifetime Deck Warranty
- Limited Lifetime Warranty on Pontoon Tubes & Transom
- Meets or Exceeds All US Coast Guard Requirements
- NMMA Certified

Deck

- All Foam-Cast Furniture
- 4 Fishing Chairs w/Composite Frames (200, 240)
- 2 Fishing Chairs w/Composite Frames (180)

Starbuck Classic Series

ONE SERIOUSLY ENTERTAINING FAMILY ROOM.

To create the biggest story for 2000, we had to use a little backward thinking. This year, we're proud to introduce the Starbuck Classic Rear Entry. Now when you pull up to the beach, you can get in and out of the boat back where you'll be swimming and goofing around. And with our exclusive Sure Step anti-slip surface, you can do it safely. In addition, we've equipped most decks with slider chairs for a more comfortable ride. Every pontoon is built to have you hopping around the lake all day long. And with a pop-up changing room and optional Porta Potti®, that's exactly how long you can stay out there. Inside every Classic, there's a sunny story.

1. **Color coordinated ABS dash and instrumentation:** Easier to read with space to mount other accessories.
2. **Under seat storage:** Large storage with easy access.
3. **SureStep® rear entry:** Makes it easy to exit and enter the boat when you pull up to your favorite beach.
4. **New upholstery:** Furniture redesigned with new foam for better support and accented with appealing stitching.

Storage

The Elite Series

WARNING: MAY MAKE FRIENDS AND NEIGHBORS INTENSELY JEALOUS.

Considering the Elite's size and luxury, it's not hard to see why. The Elite Series is spacious enough to take the whole family and still have room left over for yourself. For 2000, designers jazzed up the interior colors and redesigned all the layouts of the decks to maximize space and increase storage. There's also a new rear entry model available so you can more easily get in and out of the water when you pull up to the sandbar or the beach. Behind the wheel, drivers will appreciate the increased width of the helm seat. While up front, everyone will love the new comfortable chaise lounge. This chaise, as well as all the furniture throughout the deck, features new, more comfortable foam and softer, more luxurious upholstery that's been designed to stand up to the elements. Get out in an Elite and watch them turn green with envy.

1. **Color coordinated fiberglass console with NexGen® gauge cluster:** Easier to read with built-in depth finder and space to mount other accessories.
2. **Pop-up changing room:** Provides roomy privacy.
3. **L-seating:** Soft/rich upholstery increases luxury, while furniture has been redesigned to maximize space on the deck.
4. **Optional remote-controlled halogen deck light:** Makes docking the boat at night safer and easier.

Utilities and Jon Boats

WHERE THE LOVE AFFAIR IS BORN.

For many people, life on the water begins right here. It's been that way since 1903. Chances are, you fell in love with the water inside a 16 foot rowboat, pulling in panfish hand over fist as your father sat in the bow holding the camera and beaming with pride. We understand the importance our Jon Boats and Utilities have played in the lives of families who've counted on them. That's why we're committed to making them strong and building them to last. With double riveted seams and reinforced hulls and transoms, you can count on every one of our Jons and Utilities to get you out there on the water for years to come. And with so many different sizes and models to choose from, you can be sure you're in the right boat. So grab your rod and reel, your favorite hat, a good book and come along for the ride.

All welded Jon Boats 1448 S, 1448 LWS, 1648 S, 1750 MVXL, 1860 MVL have the same specifications as the riveted Jon Boats except for an all welded 100" gauge hull.

Accessories

IT'S WHAT HAPPENS WHEN YOU CUT TECHNOLOGY LOOSE.

For 2000, we've equipped our boats with more technology and standard features so you can get the most out of the water. But just for fun, we're also offering a few optional packages and accessories

that make life on the water even better. Whether you're going to fish, swim or tear up the lake, you'll find everything you need right here.

Family Package

Includes a portside back-to-back seat, bow cushions and a ladder.

Dealership Family

With a dealership family that spans North America, you can be sure you'll find a friendly face to help service your Starcraft, no matter where you are on the water.

Fishing Package

Includes a MotorGuide® trolling motor and a Lowrance® depth finder.

EZ Loader Trailer

Bolt together, low maintenance, galvanized trailer provides easy hauling, launching and trailering.

Custom Welded, Deluxe, Color Coordinated EZ Loader Trailer

Includes diamond step plates, chrome wheels and lug nuts with a swing away tongue for easy garage storage, as well as an illuminated Starcraft nameplate (Pro-Elite 2000) to enhance your investment.

Bow Cover

Mooring Cover

Treated to resist water and mildew and protects your boat during trailering or while you're parked at the dock.

Bimini Top

Treated to resist water and mildew and provides shade from the sun and protection from the elements.

Aft Curtain

This curtain covers the boat, running from the bimini top to the transom. Keeps you and your Starcraft clean and dry.

Drop Curtain

Available on 19 foot models and up. Helps keep you out of the elements while you're fishing. You can roll up the door, so you can simply walk in and out and fish out of the back.

JVC® CD Player

The optional AM/FM CD player with detachable face features four premium marine grade speakers and provides enhanced stereo sound.

Walk Thru Curtain

Snaps down to keep out the elements. It runs between the side consoles from the bow tonneau cover to the floor.

Vinyl Flooring

Starcraft's vinyl flooring resists sun damage and creates a maintenance-free surface. When you pull into dock, just hose it off and head home.

Mercury Propulsion

Starcraft boats come standard with a Mercury® outboard motor or MerCruiser® stern drive with optional horsepower matched to each hull for optimum performance and economy.

PERSONALIZE YOUR BOAT WITH THESE COOL ITEMS.

Mach II Performance Package

Available on select GT models and includes Silent Choice Thru Hull exhaust (side exit) and a sport steering wheel.

Corsa Silent Choice Thru Hull Exhaust

With the flip of a switch, you can reroute the exhaust through either the prop or the hull, depending on just how quiet you want to be.

Pontoon Playpen Cover

Protect your investment year-round with a heavy-weight canvas made of durable polyester duck treated to resist water and mildew.

Center Tube

Available on all 24-foot models and up, the center tube helps lift the pontoon out of the water and improves performance characteristics.

Pontoon Camper Enclosure (not pictured)

This full camper enclosure with zipper screens enables you to fully enjoy life out on the water. No matter how long you plan on being out there. Its heavy-weight canvas provides shelter from the storms and is made of durable polyester duck and treated to resist water and mildew.

Dual Bimini Top (not pictured)

Treated to resist water and mildew, provides fore and aft coverage on pontoon boats 24' and up (Stardeck and Elite models).

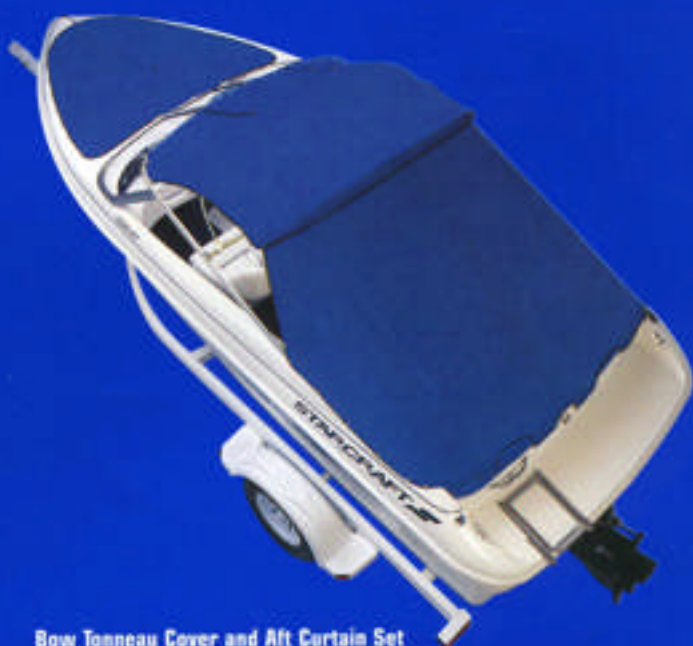

Ski Tow Bar

Provides versatile family fun and skiing on the water.

Bimini Top

Treated to resist water and mildew and provides shade from the sun and protection from the elements.

Bow Toonau Cover and Aft Curtain Set

Treated to resist water and mildew and provides protection from the elements.

Cockpit Cover

Protects your investment from water and mildew.

As long as there are lakes on the horizon and waters left unexplored, Starcraft Marine will be there. Since 1903, we've led the charge on the water. Building not only North America's strongest, most dependable boats, but creating a legend along the way. Season after season, discerning boaters have tended to gravitate toward Starcraft. Maybe it's our

comprehensive warranties. Maybe it's our large, friendly dealership family. Maybe it's the unwavering mission we set for ourselves — to build the quickest, driest, most functional boats on the water. Whatever the reason, we invite you to experience it for yourself. Take a look around the lake. There are a million reasons to get into a Starcraft. All you have to do is choose one.

When it came to the perfect boat, she made the right decision.
