

OUR 79th YEAR
OF QUALITY PRODUCTS

STARCRAFT 

1982

With
Starcraft,
you've got
a good thing
going

Starcraft's open fishing boats. Durable. Dependable.

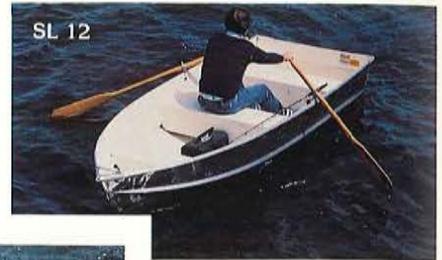

Starcraft makes three types of open fishing boats. They're all made from rugged marine aluminum and are ready to go fishing whenever you are.

Both SL models are lightweight cartoppers. They'll give you the smooth, stable ride found only in a true V-bottom boat and the safety of a non-slip painted interior.

There are three models in the SF series, with hull lengths in twelve, fourteen and sixteen feet. They're strong enough to carry you, your friends, and all your gear. And economical enough to keep you out fishing as long as you want.

Starcraft's HD 16 was designed for big water. With a generous interior side depth of 27", it can handle some of the roughest chop a big lake can dish out.

You won't get V-hull performance from Starcraft's Jon boats. But you will get an incredibly stable fishing platform that can get you places where most V-hulls can't go... like reedy shallows where the big ones spawn. And you can choose from four different Jon boat models.

Affordable.

With Starcraft, you've got a good thing going

Starcraft's no-nonsense Specialty fishing boats don't give fish

With Starcraft, you've got a good thing going

MR 180

MR 210

You'll have to look long and hard to find a fishing boat with all the built-in versatility of Starcraft's MR series. Available in eighteen and twenty-one foot models, Starcraft's MR series offers center-console steering for maximum walk-around area, the economy of marine aluminum construction, and an enviably long list of features . . . the kind of features serious sport fishermen look for when shopping for a boat.

Some of these features include a two-way helm seat (standard on MR 180, optional on MR 210). An aerated livewell (MR 180 only). Easy-clean vinyl flooring. Built-in rod storage. Lockable storage. A raised casting foredeck with storage underneath. And an extra-wide motor well that will let you install twin outboards or a single outboard and a trolling motor.

These rugged, V-hulled fishing boats get you out to where the fish are . . . whether you're fishing a sheltered inland lake or a salty offshore hot spot. We call them the MR series . . . You'll call them home for the season.

a second chance.

BASS 150
FM 160

FB 160

PM 160

BASS 170

There are plenty of reasons why the FM 160 is our most popular specialty fishing boat. It comes standard with a fold-down helm seat. A built-in livewell with aerator pump. Handy open rod storage. Marine grade carpeting. Two removable pedestal seats. It's a true V-hull with a high, dry freeboard.

Starcraft makes two aluminum Bass Boats. Both are fully equipped with features like built-in rod holders, raised casting decks both fore and aft, aerated livewells, marine grade carpeting, and two fold-down fishing chairs. In fact, the Bass V 150 and V 170 have all the features found in fiberglass bass boats except two: A higher price tag and higher operating costs.

The PM 160 is an open boat with lots of built-in storage. It's built on a runabout hull to give you a stable, sure-footed ride. It's an aluminum fishing boat with a lot of attractive features . . . and a very attractive price.

Starcraft's FB 160 is designed for back trolling. It gives you all the features you'd want in a fishing boat. And all the quality you've come to expect from Starcraft . . . America's leading aluminum boat manufacturer.

The number one seller in America's number one aluminum

Starcraft's SS series has been on America's best seller list for many years. In fact, it's America's most popular aluminum Run-about. How do you make the best even better? Let us show you . . .

For 1982, all four SS models have sporty new exterior graphics. Plush new seating arrangements. And attractively redesigned side and floor storage areas.

Yet even with all these improvements, we haven't changed the things that have made our SS series so popular. Our lightweight aluminum V-hulls are among the smoothest riding, most stable running hulls in the industry. They'll give you more running time per gallon of gas than comparably-sized fiberglass boats. They're easier to maintain. And designed to give you years of carefree boating pleasure.

There are four SS models for 1982. Sixteen and eighteen foot hull lengths. IO's and OB's. They're time-tested and performance-proven boats dressed neatly in an attractive new package. Because sometimes, the secret to improving is not changing at all.

The look is expensive. The price tag isn't.

HL 140

At first glance, Starcraft's HL models look like expensive fiberglass boats. Two-tone vinyl seating, marine grade carpeting, and sporty new graphics give them a snappy appearance in the showroom and in the water.

But look again. Because the HL series is loaded with value. Chocked full of features. And priced to make you smile. They're made from lightweight marine aluminum. So they'll cost you less now . . . and cost you less to operate in years to come.

The HL 140 is designed for people who want to get into boating, but don't want to get into more boat than they need. Standard equipment includes adjustable sleeper seats, built-in side storage, and stern jump seats. Yet it's one of the lowest priced runabouts on the market today.

The sixteen and eighteen foot models, along with the classic closed bow design, have an optional deluxe decor group that enhances their sleek, rich appearance.

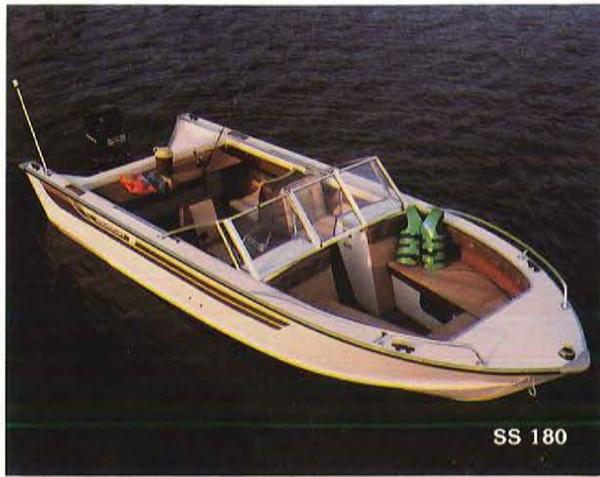

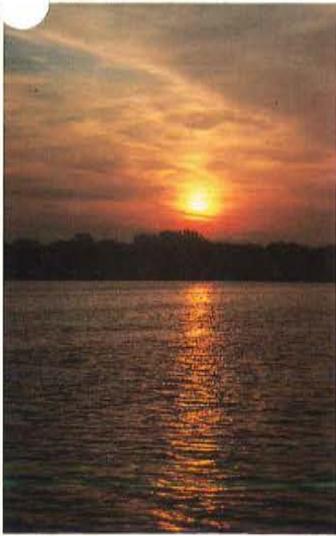

The HL V221 is the largest of the series and has Starcraft's ocean-tested deep-V aluminum hull. It's the ultimate in a smooth, dry, stable ride even in heavy chop.

Don't let the good looks fool you . . . The HL models are really sensible, economical boats.

Cruisers with lots of room for your family. And little room for

When you're America's leading manufacturer of aluminum boats, you can't rest on your laurels. You've got to keep improving. Designing and building smarter. Or you won't be a leader for long.

Our brand new CR 251V is the flagship of our 1982 line. She's big. She's impressive. And she's beautifully designed inside and out. She's built on our deep-V aluminum hull for a silky ride in all kinds of water. And she's just as comfortable tied up at dock for an afternoon of shoreside relaxation.

The cabin is a delightful blend of luxury and efficiency. It features a full galley with stove, sink and ice box. Plenty of storage, with foreberths on either side. And a full 72" of interior ceiling height. The V-berth with upholstered cushions and aft sleeping quarters provide snooze room for a family of five. And there are plenty of options and accessories available to make this trailerable weekender just what you want it to be.

The CR 251V. The design is new. The result is breathtaking.

Fiberglass...the look is elegant. The quality is Starcraft.

Starcraft's V series is now in its third year of production. All V-models have the graceful, elegant lines that can only be achieved through thoughtful, careful design. And the kind of quality you'd expect from a company that's been building quality products for seventy-nine years.

There are seven models in Starcraft's 1982 V series. All built to deliver top performance and an incredibly stable ride. Hull lengths from fifteen to nineteen feet. Roomy bow riders and classic closed bow designs. All ideal family boats. And all built to give you years of trouble free boating pleasure.

improvement.

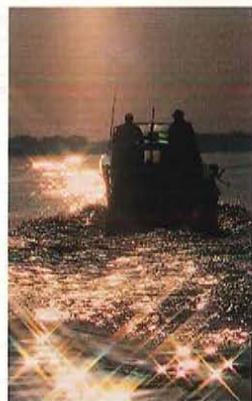

With Starcraft, you've got a good thing going

CR 221V

CR 220V

You can always spot the serious sport fisherman. He's the one with the downriggers. The outriggers. And the print out fish finders. When you do spot him, chances are good his sophisticated equipment is attached to one of our CR models. We've made them and sold them for years.

There are three CR models in our 1982 aluminum cruiser line. They're all designed with a deep, dry, open cockpit area with plenty of room to move about. And a snug cuddy cabin that provides shelter from a storm or sleeping quarters for the weekend.

The CR 221 is built on our modified-V hull that planes quickly and slices through a chop. It's one of the most affordable I.O. cruisers around. Our CR 220V and 221V models offer the smooth ride found only on our deep-V aluminum hull. Your choice of I.O. or outboard models.

A lot of families see our cruisers as ideal weekenders. Fishermen look at them as awesome fishing machines. Our records show they're pretty popular boats. No matter how you look at it.

Our WV series is built on a new seventeen-foot deep-V fiberglass hull that's been designed for quicker on-plane starts and better running economy.

There are three WV models in all. Two bow riders with room for family and friends (your choice of I.O. or outboard power). And a classic closed bow model that, with appropriate power, can move across the water at more than forty-five miles an hour.

Family fare with a flair.

Looking for the ultimate in a stable family boat? Look no farther than Starcraft's ST series. Both ST models are tri-hulls which offer superb side-to-side stability and sure, secure tracking in tight power turns. Fish from it. Swim beside it. Or ski behind it. Starcraft's ST's are ideal family fare with a stylish flair.

Starcraft's VB-150 can be anything you want it to be. Order it as a basic boat and add your own personal touches. Or, choose from a long list of options and accessories. The VB-150 . . . your kind of boat for your kind of on-water activities.

The Starcraft Aluminum Story

WHY ALUMINUM

- Save on engine costs — be it in Sterndrive, Outboard or Jet. Lightweight aluminum means less engine for more performance.
- Save on trailer costs — lightweight aluminum means you can buy a trailer with a lower capacity rating. The lighter the trailer the lower the cost. In other words, lightweight aluminum means save on your total boating package: Less engine, less trailer means less money for the same boating pleasure.
- Save on towing — the Starcraft 18' is within the towing limits of most of America's new down-sized cars and will not void new car warranties. And . . . don't forget, the fuel economy of towing your Starcraft aluminum boat.
- Save on maintenance — maintenance on taking care of your Starcraft aluminum boat is as simple as washing and waxing the family car.
- Save on fuel expense — stay on the water longer without refueling which means more miles per tank.

WHY STARCRAFT ALUMINUM

- We started it all. Starcraft has been building boats for over 50 consecutive years.
- Over 750,000 Starcraft boats have left our factory doors to happy consumers the world over. Aircraft type quality construction. One piece bottom with double riveting. The first and only deep vee aluminum hull in the industry.
- The first and only aluminum boat company which offers power packages in outboard, sterndrive and jet.
- The first and only aluminum manufacturer which offers you more of a selection with: Open Utility and Specialty Fishing Boats, Runabouts, Off-Shore Center Console and Cruiser Deep Vee Fishing Boats, as well as Cabin Cruisers . . . ranging in size from 12' to 25'.

Beware of imitators — there is only one Starcraft Marine, building quality boats as we have for over 50 years.

Starcraft is our only brand name — you won't find our quality at a discount store. Starcraft Marine is a pioneer and innovator in the aluminum boat industry and we've sold more than anyone. That's why many competitors copy our models, at least in appearance. But they can't copy our quality and integrity or our boat building experience.

Since 1968, we have been proud to be part of the same company that manufactures Piper Aircraft, Smith & Wesson Arms and Cal and O-Day sailboats . . . a financially strong company that will be here in the future when you may need parts or service on your boat. But, in the end, the people on the production lines are the ones that make Starcraft boats the highest quality boats you can buy. Experience counts!
