The Starcraft Aluminum Story

WHY ALUMINUM

- Save on engine costs — be it in Sterndrive, Outboard or Jet. Lightweight aluminum means less engine for more performance.
- Save on trailer costs — lightweight aluminum means you can buy a trailer with a lower capacity rating. The lighter the trailer the lower the cost. In other words, lightweight aluminum means save on your total boating package: Less engine, less trailer means less money for the same boating pleasure.
- Save on towing — the Starcraft 18' is within the towing limits of most of America's new down-sized cars and will not void new car warranties. And . . . don't forget, the fuel economy of towing your Starcraft aluminum boat.
- Save on maintenance — maintenance on taking care of your Starcraft aluminum boat is as simple as washing and waxing the family car.
- Save on fuel expense — stay on the water longer without having to refuel which means more miles per tank.

WHY STARCRAFT ALUMINUM

- We started it all. Starcraft has been building boats for over 50 consecutive years.
- Over 750,000 Starcraft boats have left our factory doors to happy consumers the world over.
- Aircraft type quality construction. One piece bottom with double riveting. The *first and only* deep vee aluminum hull in the industry.
- The *first and only* aluminum boat manufacturer which offers power packages in outboard, sterndrive and jet.
- The *first and only* aluminum manufacturer which offers you more of a selection with: Open Utility and Specialty Fishing Boats, Runabouts, Off-Shore Center Console and Cruiser Deep Vee Fishing Boats, as well as Cabin Cruisers . . . ranging in size from 12' to 22'.
- Starcraft has over 50 service centers throughout the U.S. and Canada. We conduct aluminum service clinics for our dealers.

Your Starcraft Dealer Is:

**We've Built More Pleasure Boats
Than Anyone Else In The World!**

Beware of imitators — there is only *one* Starcraft Marine, building quality boats now like we have for over 50 years.

Starcraft is our *only* brand name — you won't find our quality at a discount store. Starcraft Marine is a pioneer and innovator in the aluminum boat industry and we've sold more than anyone. That's why many competitors copy our models, at least in appearance.

But they can't copy our quality and integrity or our *boat building experience*. Just the small number of people in this picture have over 1,000 years of experience building

Over 1,000 Years of Experience

Starcraft Company is a member in good standing of the Boating Industry Association. All Starcraft boats meet or exceed the standards established by B.I.A. for flotation, fuel systems, ventilation, electrical and safety as evidenced by the B.I.A. seal affixed to every Starcraft boat. In addition to these rigid standards, Starcraft boats are in compliance with all Federal and State regulations regarding boat safety, construction and identification.

Starcraft boats. Some have never worked anywhere else and we have many more experienced people in addition to those pictured.

Since 1968, we have been proud to be part of the same company that manufactures Piper Aircraft, Smith & Wesson Arms and Cal and O-Day sailboats . . . a financially strong company that will be here in the future when you may need parts or service on your boat. But, in the end, the people on the production lines are the ones that make Starcraft boats the highest quality boats you can buy. Experience counts!

PLEASE READ CAREFULLY: Dimensions, capacities, ratings and additional specifications plus complete warranty and service information are available from your Starcraft dealer. All product illustrations and data within this catalog are based upon information available at the time of publication. Due to publication errors, on-going product modifications and/or component part availabilities, Starcraft reserves the right to make changes without notice or obligation. You are advised to consult your local Starcraft dealer for most current product specifications prior to purchase. Some of the equipment shown separately or on products illustrated in this catalog may be optional at extra cost.
