# EVERY DETAIL SETS US APART.

Starcraft fiberglass boats are constructed to the most exacting standards. Learn more about the elements that add up to industry-leading quality.

- We start by applying wax to our meticulously cared for hull and deck molds.
- 22 ml of ISO-NPG high-luster Gel Coat is applied, followed by a Blister-Guard barrier coat to protect the appearance of your boat.
- An integrated stringer system provides unmatched strength and durability.
- Alternating layers of 24 oz. woven roving and 60 ml fiberglass matting fully encapsulate all stringers and components.
- An 8-inch overlap is made at the hull bottom to ensure the boat is the strongest where it needs to be.
- Each deck contains 2 ml of coremat and 18 oz. of bi-axial fiberglass for the best possible quality.
- Each hull is weighed for consistency and thoroughly inspected before it moves on to the assembly process.
- All unfinished surfaces are coated with Gator Shield protective coating that is anti-shock, reduces noise and protects against rust and water intrusion.

- A** — **SPACIOUS INTERIORS:** Starcraft leads the way with innovative floorplans that maximize space inside the boat. From the roomy walk-in bow with seating for four, to the added safety and comfort of deep interiors, to plush, generous bucket helm chairs—it's all about being able to spread out and enjoy the day.
- B** — **DRIVER'S CONSOLE:** This luxuriously appointed helm station with an ergonomically-designed dash and helm seat offer plenty of room for technology options.
- C** — **35 OZ. VINYL UPHOLSTERY:** Comfortable and strong, the upholstery features self-draining foam for lasting durability.
- D** — **SURE STEP SAFETY PLATFORMS:** Wide, secure swim platforms, both front and aft, feature deepwater ladders for safety and convenience.
- E** — **UNITIZED 2-PIECE HULL:** Top and hull are screwed and bonded together, creating the added strength needed to secure your lifetime hull warranty.
