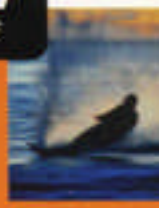
First on the water since 1903.

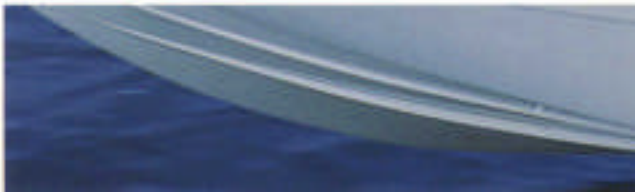
STARCRAFT MARINE



OUR STANDARDS FOR BOAT-BUILDING EXCELLENCE ARE SO PRECISE.

WE CAN EVEN MEASURE EXHILARATION.

Fiberglass Boats 2001



Admit it. You're drooling to get out there. To go ripping across the water at 50 mph. To see your kids trade in their joysticks for the business end of a tow rope. To wake up one morning and suddenly find yourself with tanned toes, sun-streaked hair, and a ridiculous grin on your face.

At Starcraft, we know the feeling. In fact, you could almost say we invented it. Since 1903, we've been building boats that get people out on the water and into the good life. Summer after summer. Generation after generation.

It's a boating heritage that spans nearly 100 years and probably even includes a few relatives of yours who, somewhere along the line, owned a Starcraft.

Well, now it's your turn. To help you find yourself on the open water, Starcraft is offering a heart-pounding new line-up of fiberglass boats for 2001. Performance boats. Runabouts. Fish and ski boats. Offshore boats and more. So come on. Say goodbye to the old routine and start living life outside the wake for a change.

NEARLY A CENTURY OF STRENGTH, RELIABILITY, AND ADRENALINE-SOAKED FUN.

STARCRAFT
MARINE

Look, you don't have to understand how a fiberglass boat is built, to know it's built right. One ride will tell you that. Does the boat feel solid in your hands? Can it knock down waves all day without hammering your body? Does it work *with* the water rather than against it?

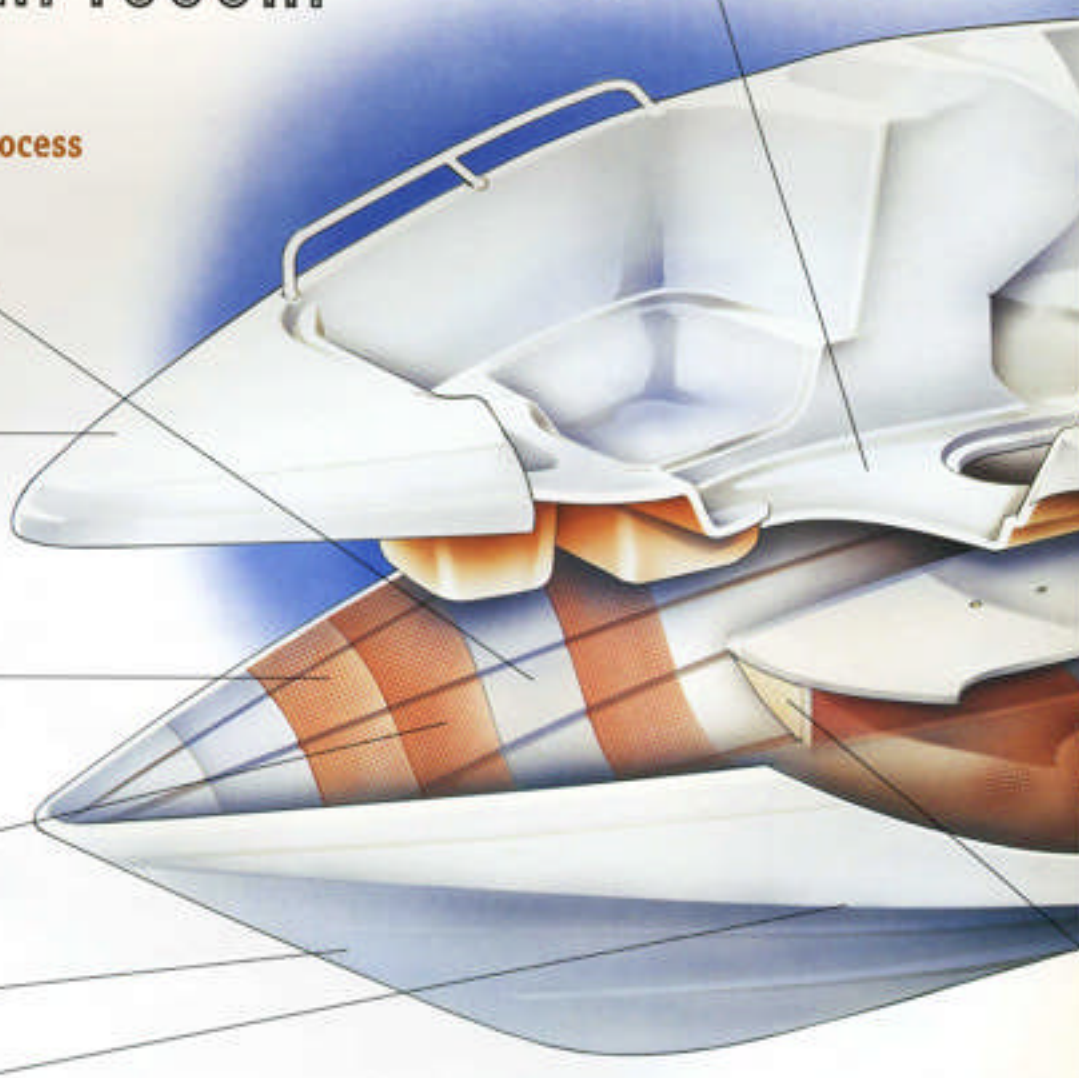
At Starcraft, we build fiberglass boats that'll take a beating and still come storming back for more. Whether it's 4-foot, knuckle-busting seas or a boatload of feisty teenagers and their gear, Starcraft boats are built tough from the inside out. How tough? Just look at the illustration below. Or better yet, take a test drive. Then go ahead. Pick a fight with some nasty looking waves.

Is enough ever really enough?
Heck no. At Starcraft, quality control is a never-ending passion. Case in point. To make sure your fiberglass boat is as flawless as possible, we clean and buff each mold after every single use, eliminating any scratches or imperfections.

24-OUNCE WOVEN ROVING FIBERGLASS WITH SIX-INCH OVERLAP.

TRANSLATION: TOUGH.

Fiberglass Construction Process



(1) Premium high gloss gelcoat, with 20 mil thickness, is sprayed onto the mold to provide maximum blister resistance and UV protection.

(2) Spraycore® barrier coat, with 80 mil thickness, is applied to the sidewalls for greater strength and rigidity with less weight. This process also eliminates hot spots for an improved finish (not done by most competitors).

(3) First layer of multidirectional hand-rolled fiberglass, the "skin coat," is applied.

(4) Fiberglass is hand laid.

Second layer of fiberglass woven roving is applied, along with a balsa core, for greater strength in high-stress areas and less weight.

Fiberglass is applied to high-stress areas for added strength.

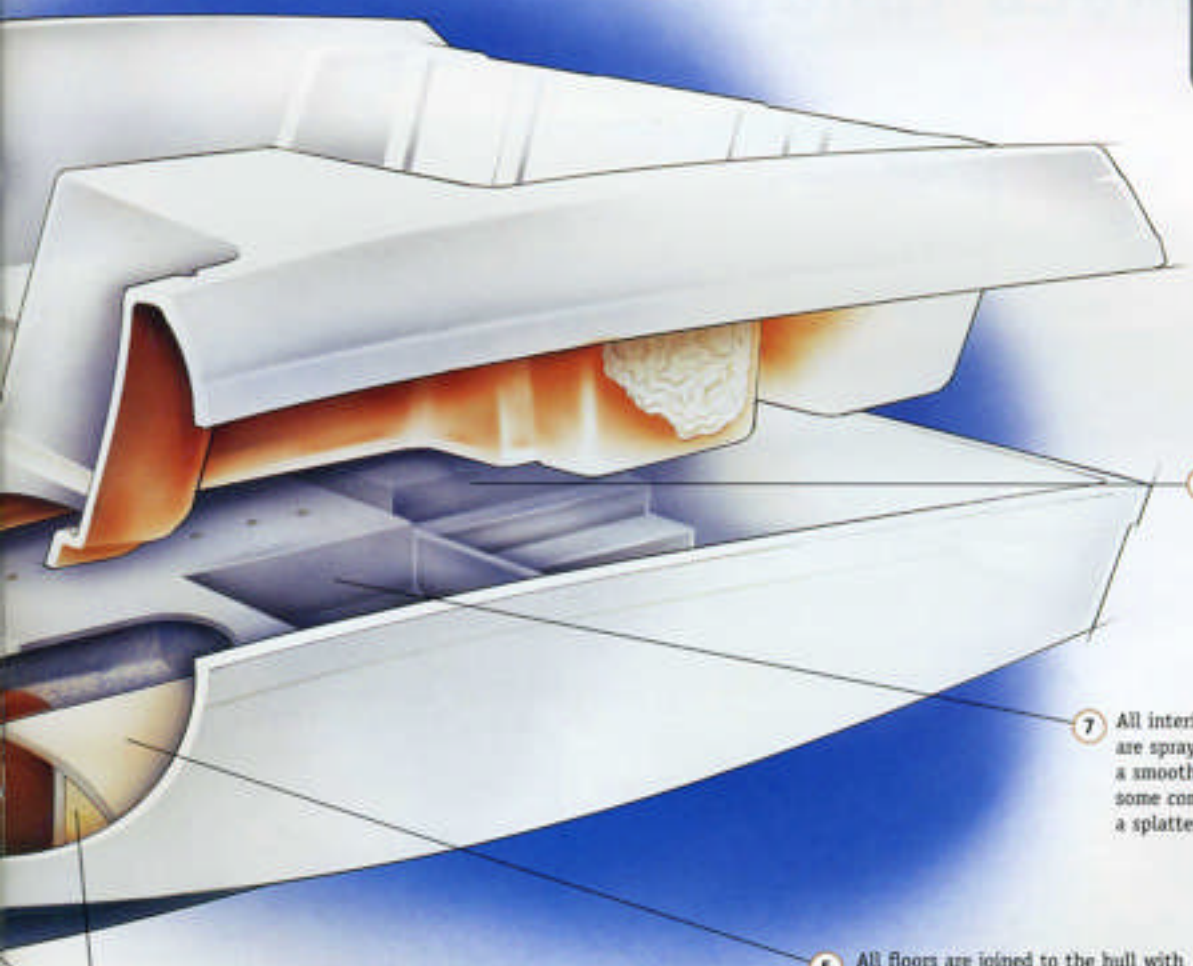
Fiberglass is hand laid at all chine and strake lines.

(9) A full fiberglass liner permits quicker, easier cleanup and maintenance.

What makes our fiberglass boats so tough?
Well, for starters, the fiberglass itself. At Starcraft, we use 24-ounce woven roving fiberglass instead of 18-ounce like the others. We also insist on a 6-inch overlap between the hull and deck for greater strength and a tighter fit. Our competitors' overlap? Typically, one or two inches. And to assemble the deck and hull, we use a combination of thru-bolt construction and a fierce bonding adhesive that just won't let go.

WARRANTIES

We build Starcraft boats to provide years of superior performance and reliability, and our warranties back up that level of quality construction. Starcraft warrants each fiberglass hull for 5 years. All warranties are based on years of use under normal recommended operating conditions. Please see your authorized Starcraft dealer for complete warranty information.



6. The stringer system below deck is fully encapsulated in fiberglass to lock out moisture.

7. All interior storage compartments are sprayed with a gelcoat finish for a smooth, clean appearance, unlike some competitors who simply spray a splatter coat.

5. All floors are joined to the hull with 24-ounce woven roving fiberglass, followed by a resin coating and a second layer of fiberglass.

8. Foam is injected, not poured, between the hull and the deck, filling all air pockets and preventing water leaks. This process also increases hull strength while it decreases noise and vibrations, giving you a quieter, smoother ride.

1. **Helm console:** Updated for 2001 with stainless steel gauges, stainless steel bezels, and a brushed aluminum dash panel (N/A 1959 & 2312).
2. **Air Star Tower package:** Optional tower with Sunbrella® top provides out-of-the-way storage for wakeboards, kneeboards, and skis. A higher pivot point for the tow rope makes wakeboarding easier and more fun. The tower also houses a 200 watt amplifier and two 100 watt Canon® speakers for the CD player (available on 1910 LXS and 1910 GT).
3. **Hinged in-floor ski storage:** Featuring new mildew-resistant carpeting.
4. **Retractable swim ladder:** Integrated swim platform with retractable ladder helps tired skiers into the boat.
5. **Chaise lounge/Console storage:** Rear-facing chaise lounge with roomy storage for life jackets and towels (1910 GT, 1910 LXS, 2510 GT, & 2510 LXS).
6. **Fender storage:** Handy storage for protective fender (N/A 1910 GT, 1910 LXS, & 1959).

THE ULTIMATE PERFORMANCE BOAT FOR ALL YOU POWER-CRAZED THROTTLE JOCKEYS.

Nexstar Series

When our Nexstars first raced onto the waterfront scene last year, we could hardly keep up with the demand for these hard-cranking, low profile screamers. So what did we do for 2001? Launch six new models, of course. A cuddy cabin, 25 footers, a fish and ski model, and more — they're all here, all ready to go.

With its sea-taming, 102" Wide Trac Hull™, the Nexstar turns in an amazingly stable ride at max speeds, even through sharp turns and choppy water. And this year, it's absolutely jam-packed with accessories and upgrades. You'll find comfier, more luxurious furniture. Sporty new colors and graphics. An easy-clean fiberglass liner. Even a new optional Air Star Tower that gives wakeboarders bigger air — and you a safer place to stow all those wakeboards and skis. The new 25' models also have an optional wet bar package featuring a refrigerator and shore power.

Searching for a sleek, responsive speedster? Fire up a Nexstar, and give that throttle arm of yours a little exercise.

THIS BOAT GIVES OFF POWERFUL VIBES.

EVEN WHEN IT'S SITTING STILL.

1800 Series

Need a big jolt of fun? Lay on the throttle of this feisty 18-footer. It's one of three new thrill-seeking 1800s from Starcraft. What's so new about them? Practically everything. New models (for skiing and fishing). New colors and graphics. Nicer upholstery. Larger storage compartments. And, here's the real kicker — a new dihedral hull. It gives you more stability in sharp turns, allowing you to circle around faster for fallen skiers and zip about the lake with more agility and speed.

The 1800 Series. 4.3 liters of pure, unadulterated go.

4. **Large, lighted change room with Porta Potti®:** Features non-skid flooring and a screened "porthole" for ventilation.
5. **Transom shower:** Handy freshwater shower allows you to rinse off sand and dirt.
6. **Underseat storage:** Dry, roomy storage area with new mildew-resistant carpeting.
7. **Refreshment center:** Featuring On-Demand®, freshwater pressurized faucet with sink and 2 cup holders.

EVERYTHING YOU NEED FOR AN 18-HOUR DECK PARTY.

SMILES INCLUDED.

Aurora Series

Pack a gigantic cooler, round up a dozen friends, and say goodbye to dry land for the next 18 hours. You're spending the day aboard a Starcraft Aurora. With a standard Porta Potti®, transom shower, sink, and AM/FM CD player with detachable face, the Aurora is easily the best equipped deck boat out there. It offers dozens of standard features that are only options on other deck boats. And now, it even fishes.

Introducing the new 2009 Fish & Ski model. It has everything the serious (and not-so-serious) angler could hope for. Ample rod storage. A built-in tackle box. A bow command center. Even a live well to keep your catch healthy. What's more, the 2009 is fully convertible — all the amenities you need to switch from skiing to fishing mode are already onboard. The fishing chairs are neatly tucked inside their own portside underseat storage area (not waiting for you back at the dock). And the removable tabletop can be easily stowed away in the large changing room.

The fully-loaded Aurora Series for 2001. How many more reasons do you need for a party?

Boats shown with optional trailer.

Expedition
Walk-Around Series

For many anglers, half the fun of saltwater fishing is just getting out there. Clearing your mind. Breathing in the familiar salt air. Seeing how much distance you can put between you and civilization. Good thing there's a boat that can take you there. The Expedition Walk-Around.

With its solid composite stringer system and 102" beam, the Expedition is specially built to withstand the meanest offshore waters — and still keep you grinning all the way out. You'll stay drier, too, because all drain lines are located above the waterline, allowing excess water to drain out of the boat without the bilge pump running continuously. We've also added comfort features like stainless steel footrests and toe kicks. Pop-up cleats that stay out of your way. And a stainless steel propeller that's standard on all Mercury® outboard factory-equipped packages. We've even improved access to the plumbing and electrical systems.

As always, the deep, wide walk-around gives you plenty of room to work the fish. And when the slugfest is over, there's a comfortable V-berth cabin below. Looking for a solid, dependable overnighter that'll carry you all the way out to bluefin territory? Smile. The Expedition Walk-Around is ready to shove off.

Shown with optional T-top and trailer.

1. **Helm console:** Features stainless steel wheel with padded grip, new custom windscreen, stainless steel throttle binnacle, and compass.
2. **Chart tube:** Provides safe, dry storage for your maps.
3. **Fish box:** Insulated and roomy enough to hold your limit.
4. **Stern pop-up cleats:** Stainless steel cleats stay out of your way until you're ready to tie off.
5. **Anchor storage:** With new stainless steel anchor rope tension lock to secure your line.
6. **Storage bays/Portable coolers:** Large port/starboard storage bays with new easy-lock latch. Each contains a portable 6-can cooler for your favorite beverages.
7. **Bait riser:** Lifts up to drain water from the bait well, making it easier to grab hold of live bait.
8. **Stainless steel toe kicks:** Make it easier to pull in your catch.

CATCH YOUR LIMIT BY 6:30 AM.

OR JUST ENJOY THE SOLITUDE.

Expedition

Center Console

2280
Shown with optional T-top and trailer.

With the Expedition Center Console, it's easy to do both. Get out there before daybreak, and then just settle back with a steaming cup of coffee and wait for your first strike. Could there be a better way to start the day?

With its deep, roomy cockpit and 102" beam, the Expedition is built for serious offshore or deep water action. This year, it's equipped with our solid composite stringer system for greater strength in grueling seas. And it's completely self-bailing — from the anchor storage all the way down to the cup holders.

We've also insisted on a new chart tube to keep your maps safe and dry. Stainless steel toe kicks and footrests. A large bait well with bait riser to help you grab hold of live bait more easily. Pop-up stern cleats. Improved access to the plumbing and electrical systems. And, well...you get the idea.

Don't settle for a boat that can't go the distance. Choose a fully-equipped Expedition Center Console. And start making the most of your time on the water.

Protects your boat during trailering or while you're docked. Treated to resist water and mildew.

IT'S A GREAT BIG WATERY WORLD OUT THERE.

GO EXPLORE YOUR OPTIONS.

Accessories

What'll it be? Slalom skiing, wakeboarding, saltwater fishing, or settling back for a quiet sunset cruise? Before you make that decision, ponder this. What accessories will you take along? At Starcraft, we build boats with enough standard features to keep your crew smiling all summer. But we also offer a variety of upgrades and option packages to make life on the water even better.* So come on. Jump in. It's time to start exploring your options.

* Not all accessories are available on every Starcraft boat. Please refer to the specification pages for a detailed listing of standard features and options.

Corsa Silent Choice Thru Hull Exhaust
With the flip of a switch, you can reroute the exhaust through either the prop or the hull, depending on just how quiet you want to be.

Bimini Top
Provides shade from the sun and protection from the elements. Treated to resist water and mildew.

Mach II Performance Package
Includes our Corsa Silent Choice Thru Hull Exhaust (side exit), a sport steering wheel, deck medallions, and a stainless steel propeller. Available on the Nexstar Series.

VOLVO PENTA®

Volvo Engines
Selected Starcraft deck boats come standard with a Volvo stern drive engine.

Bow Tonneau Cover & Bimini Top
Both are treated to resist water and mildew. The bow tonneau cover keeps the bow area clean and protected from the elements when not in use. The bimini top provides shade from the sun and protection from the elements.

Bow Tonneau Cover, Bimini Top, & Aft Curtain
Maximum protection from bow to stern, including an aft curtain that covers the back of the boat, from the bimini top to the transom. All three covers are treated to resist water and mildew. Side curtains are also available.

Mercury Propulsion

Selected Starcraft boats come standard with a Mercury® outboard motor or MerCruiser® stern drive with optional horsepower matched to each hull for optimum performance and economy.

MERCURY

CAN TRUE HAPPINESS BE THAT FAR OFF?

Funny thing about boating. It just naturally makes people happy. It doesn't matter whether you're a novice or an experienced captain, there's just something about being in a Starcraft boat that makes you feel good.

Could it be the unwavering quality? The comprehensive warranties? The nationwide network of Starcraft dealers? The 98 years of boat-building excellence? Undoubtedly. But it's also something more.

It's the experience itself. The thrill of throttling down on your first ride of the season. Your two-year-old falling asleep to the pulse of the motor. The tug of an old bass that's grown too big not to catch and release. It's a million little things that make owning a Starcraft boat so intensely rewarding. What's your definition of true happiness? You'll never know until you get out there and find it.
