1985 FIBERGLASS RUNABOUTS AND CRUISERS.

STARCRAFT

LUXURY, STYLE AND CONTEMPORARY EXCITEMENT

CPS 15

CPS 17

CPS 20

Competition Performance Series.

We introduced the revolutionary new CPS 20 last year. This exciting Art Carlson design met with immediate success and has led to two more stylish CPS models.

This years CPS 20 is available in our attractive new color schemes and can be equipped with an optional stern 'wing' for convenient ski rope attachment. The CPS 17 and CPS 15 are brand new outboard runabouts built on modified-V hulls with bold, rakish lines. They look fast even when they're sitting still.

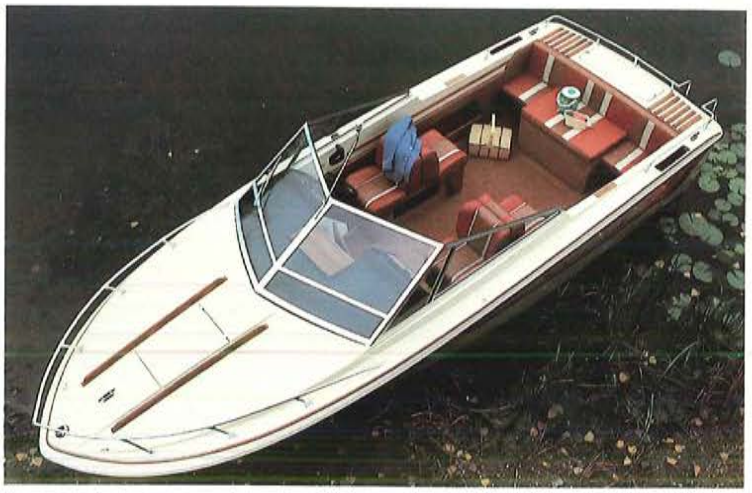
IN ALL OUR NEW FIBERGLASS MODELS.

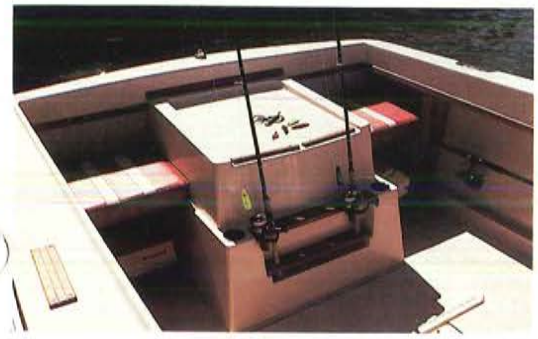
SC 221

If we could capture the essence of our SC 221 in one word, it would have to be class.

It's built on a hull that performs smoothly. Reliably. Almost flawlessly. The cockpit and cuddy cabin are luxuriously appointed in every detail, including touches of genuine teak.

The SC 221 is a boat that will turn heads as easily as it turns at full throttle. And it does both with a touch of class.





This brand new cuddy cabin cruiser has been designed specifically for the serious, big-water fisherman. Standard features include a self-bailing fiberglass inner liner, a large capacity in-floor fish-well, an aerated livewell, and both vertical and horizontal rod storage.

The spacious, open cockpit area is deal for fighting and landing fish. The rear seats are removable for easy access to the stern. Down below, the cuddy cabin has upholstered V-berth cushions, a headliner, lights, and a lockable door.

SC 221 OFFSHORE

ST 150

Our ST 150 is a Tri-V that offers superb side-to-side stability and secure tracking in tight power turns. If you need a boat that has to be several boats rolled into one, our ST 150 is just right for you.

Maximum H.P.	N/A	N/A	90
Weight Systems Dry	2420 Lbs.	2350 Lbs.	745 Lbs.
Fuel Capacity	70 Gal.	70 Gal.	N/A

Art Carlson is a well-known designer who has made many contributions to the current state-of-the-art in boat styling.

He began his association with Starcraft two years ago with the highly successful Contemporary Sport Series. This year we're expanding Art's Competition Performance Series. Its hull design incorporates a multi-stepped center pod and trihedral running surfaces that perform with a minimal amount of drag and friction. The twin sponsons assist in creating aerodynamic lift for outstanding running efficiency. Speed and performance data are still being collected, but top speeds of over 60 MPH have been documented with unmodified stock outboard engines.

The success we've experienced by merging Art's futuristic concepts with our mass production capabilities has been outstanding. Our continued association can only mean more high-performance, highly luxurious marine products for you, our customer.

STARCRAFT
A LEAR SIEGLER COMPANY
W. Starcraft Drive, Topeka, IN 46571

Starcraft Company is a member in good standing of the Boating Industry Association. All Starcraft boats meet or exceed the standards established by B.I.A. for flotation, fuel systems, ventilation, electrical and safety as evidenced by the B.I.A. seal affixed to every Starcraft boat. They are in compliance with all Federal and State regulations regarding boat safety, construction and identification.

Dimensions, capacities, ratings and additional specifications plus complete warranty and service information are available from your Starcraft dealer. All product illustrations and data within this catalog are based upon information available at the time of publication. Due to publication errors, on-going product modifications and/or component part availabilites, Starcraft reserves the right to make changes without notice or obligation. You are advised to consult your local Starcraft dealer for most current product specifications prior to purchase. Some of the equipment shown separately or on products illustrated in this catalog may be optional at extra cost.
