FISHMASTER

If you've always wanted a bass boat, but hesitated because of the wealthy price tags on fiberglass models ...we've got a good thing going for you. Fishmaster. A new line of fishing machines with all the "good things" fishermen want built right in. Good things such as live wells, pedestal swivel seats, lockable rod compartments, side console steering, lure trays, upright and level flotation and casting platforms.

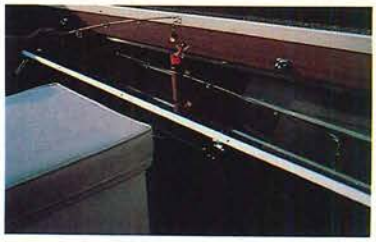
Fishmaster 16 and 18 have it all. Plus a lot more to make them perfect bass boats. And our Fishmaster 22 is the perfect big-water fishing boat. It's built upon our performance-proven V-5 hull and features twin fish wells plus storage compartment in the bow. An adjustable helm seat, lockable glove box, drop board on the motor well and 50-gallon fuel tank make Fishmaster 22 V-5 an angler's dream.

All three Fishmasters are built with marine aluminum. Which means you get bass boat features plus the economy of aluminum. Less weight than fiberglass means you can use a smaller, less expensive outboard without sacrificing performance.

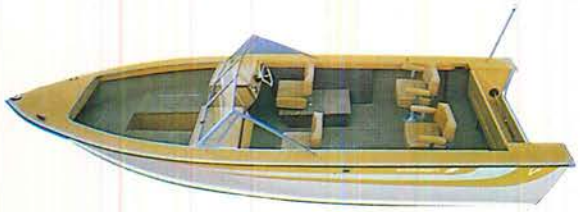
Seat box at side steering console on Fishmaster 16 & 18 houses a live well with aerator that's large enough to hold a day's catch.

Fishmaster 16 delivers all the "good things" you like about bass boats plus the economy of marine aluminum.

Twin fish wells with thru-hull drains flank center storage compartment in bow of Fishmaster 22 V-5.

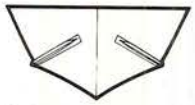


Lockable rod storage compartment is a standard on all three Fishmaster models.

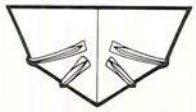


Fishmaster 22 V-5

Fishmaster 18



Fishmaster 16 & 18 feature Starcraft's Modified-V hull, a proven, durable hull design for over 25 years.



Fishmaster 22 V-5 features our performance-proven V-5 hull, the latest in marine aluminum hull design.

STARCRAFT

MARINER

Our Mariner line has had a good thing going for over a decade now. Rugged marine aluminum construction is one reason. Runabout-type modified-V hull performance is another. Center console steering is yet another. The list goes on, including bow casting platform and storage, rod racks, teak trim and pedestal swivel chairs.

Upright-and-level flotation has been added to this year's Mariner 18′ models to provide you with an extra margin of safety. And, there's a brand new Mariner model. Mariner 22 V-5...built upon our latest aluminum hull innovation. The Starcraft V-5 hull provides a smoother ride in rough water plus more cockpit space inside the boat.

Mariner 22 has all the "good things" fishermen love, including lockable rod storage, twin live wells, 50-gallon fuel tank and lots of extra touches.

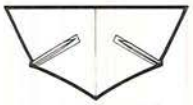
Whichever Mariner you choose, 18, 21 or the all new Mariner 22, you know you'll get a good thing going. Because it's a Starcraft.

The new Mariner 22 V-5 is a lot of fishing boat, with the performance-proven V-5 hull and lots of "good things" for fishermen.

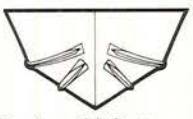
Mariner's optional Bimini top group maintains the large, open cockpit feeling while providing good weather protection.

Mariner 21

Mariner 18



Mariner 18 & 21 feature Starcraft's Modified-V hull with innovations like our one-piece bottom, rolled-in splash rails and aircraft-type riveting.



Mariner 22 features the new V-5 hull, with its deeper V and sharper entry to handle rougher waters.

Forward of the center steering console is one of the storage areas built right into every Mariner model.

KINGFISHER

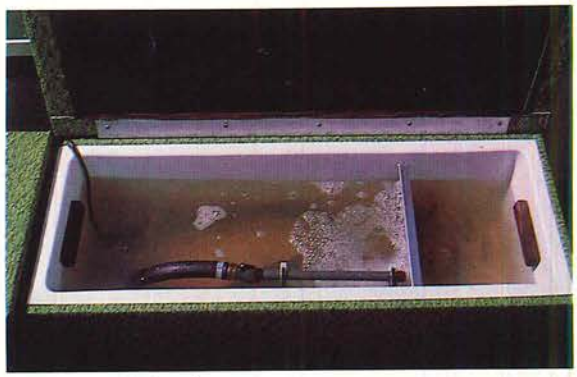
One step above the familiar open fishing boat, you'll find our Kingfisher models. Side console steering with wheel, side and bow decks, under-seat storage and vinyl floor covering gives Kingfisher 14 and 16 a little more comfort, a lot more convenience than found in open fishing boats.

And both Kingfisher models invite customizing to suit your needs. Or, if you prefer, start out with the ultimate by selecting our Kingfisher 16 Pro. We took a very good fishing boat and made it even better. By adding a lot of the features found on fiberglass bass boats. Good things like a raised forward casting platform with storage compartment, three upholstered pedestal swivel chairs, live well with aerator and bait board, drink holders on the steering console and a removeable bow light for easier mounting of a trolling motor.

Kingfisher 14, 16 and 16 Pro. Three great ways to get a little more fishing boat without spending a lot more money.

Get to your favorite "fishin' hole" in style aboard Kingfisher 16 Pro, the economical fishing boat that has all the features of more expensive bass boats.

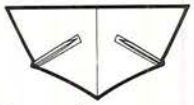
You'll appreciate Kingfisher 16 Pro's features most when the big ones are bitin'.



Kingfisher 16 Pro has a permanently-installed live well with aerator, big enough to hold your limit.

Kingfisher 16

Kingfisher 14



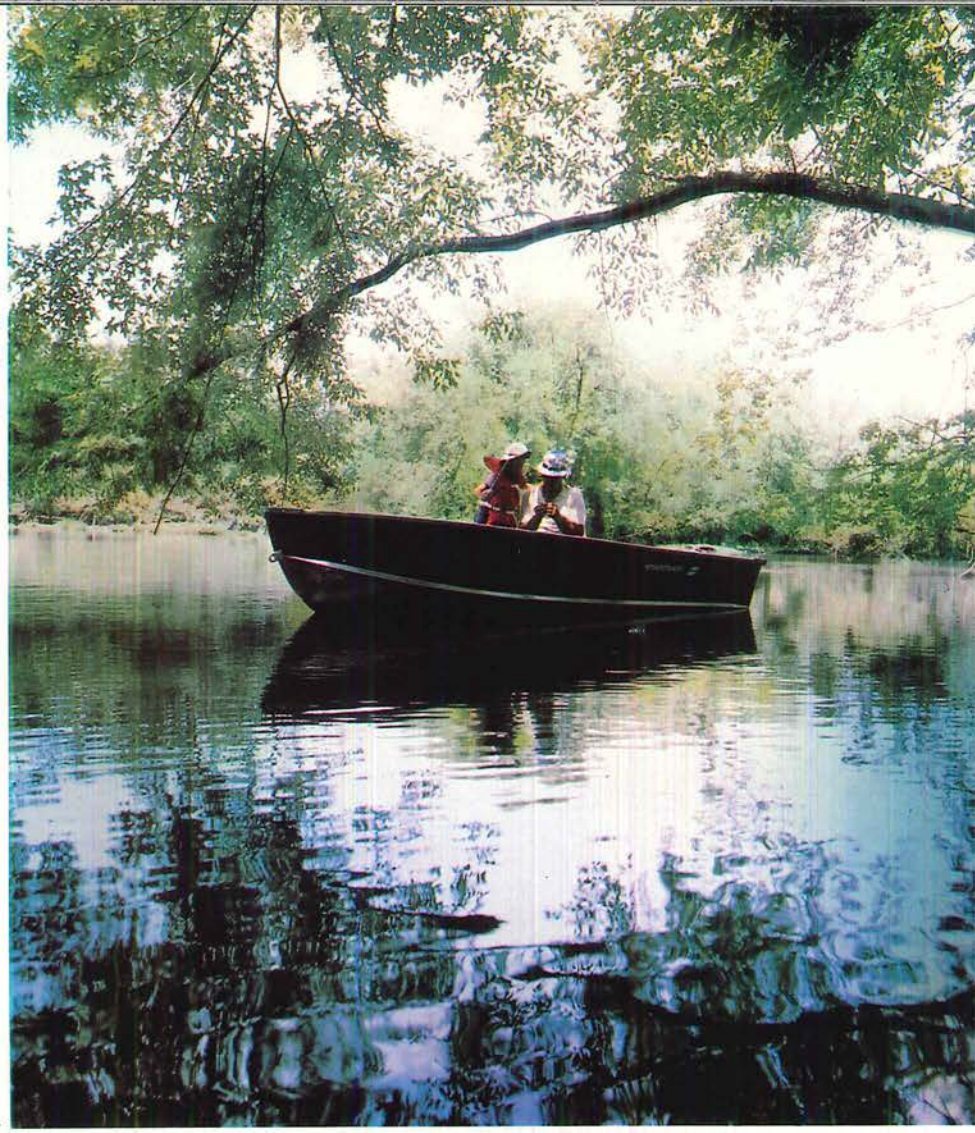
Starcraft's Modified-V hull provides all three Kingfisher models with runabout-typ performance, stability and durability. Plus, upright-and-level flotation for extra safety and peace of mind.

SEAFARER & SEALITE

For 75 years, Starcraft has been fabricating sheet metal. And for 63 of those years, we've been building metal boats. So, there's a lot of heritage in our Seafarer and Sealite models. And a lot of experience.

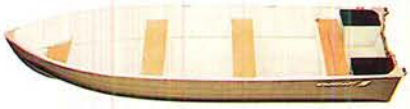
Our traditional open fishing boats are built in a way few other builders can match. With 5052 marine aluminum, the type that's used on costly custom yachts. With aircraft-type riveting on all seams, instead of welding. With a one-piece bottom that means no centerline seam that could ever leak—a Starcraft innovation. With rolled-in lapstrakes and splash rails. Plus transom braces, gunnels, stern and bow castings, built-in hand holds, oarlocks and, this year, upright-and-level flotation.

Compare these Seafarer and Sealite features to others. You'll see why with Starcraft, you've got a good thing going.



Seafarer 14-4

Sealite 12 weighs only 98 lbs., so it's easy to handle and to transport.

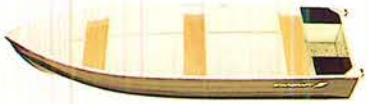


Seafarer 16

Sealite 14

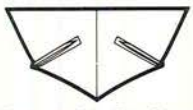
Seafarer 14-4

Sealite12



Seafarer 14-3

Seafarer 12



Starcraft's Seafarer and Sealite models feature the Modified-V hull for best performance and stability.
