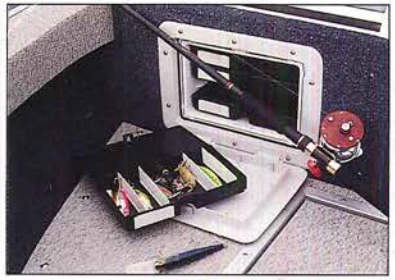
FISHMASTER 190

Introducing the Fishmaster™ 190, the newest in Starcraft's series of big-water fishing boats ... value-packed fishing boats built for all kinds of waters.

The Fishmaster 190 is built tough, with the kind of strength and dependability you'd expect from a big-water boat. The four-rib interior stringer system that's integrated into the transom is part of that strength. So are **double** rivets set in a stronger zig-zag pattern at all heavy stress points.

The Starcraft® Fishmaster 190. Big value and big fishability in a big-water aluminum fishing boat.

STARCRAFT



Convenient pull-out tackle trays provide easy access to your lures.

Bow storage keeps your gear safe, dry and ready to use when needed.

Stern storage on the Fishmaster 190 gives you plenty of room to store your big-water fishing gear.

The Fishmaster 190's deluxe instrumentation allows you to monitor your boat's performance from the comfort of your helm seat. Also standard is a Humminbird Platinum ID Fish Finder.

STARCRAFT FISHMASTER 190.

Because You Expect More In A Big-Water Fishing Boat.

You're serious about your fishing. That's why we're serious about making the new Starcraft Fishmaster 190 the best value in its class.

With standard features like an aerated bow livewell, stand-up convertible top, walk-thru windshield, built-in tackle tray, marine-grade vinyl on floors and decks, extra-deep motor well, stepped transom for auxiliary outboard, and more.

Top-quality, brand-name components with power by Mercury® or Mariner® outboards, a Humminbird® Platinum™ ID fish finder, AM-FM stereo cassette player and custom deluxe welded hull-matched trailer. All standard.
