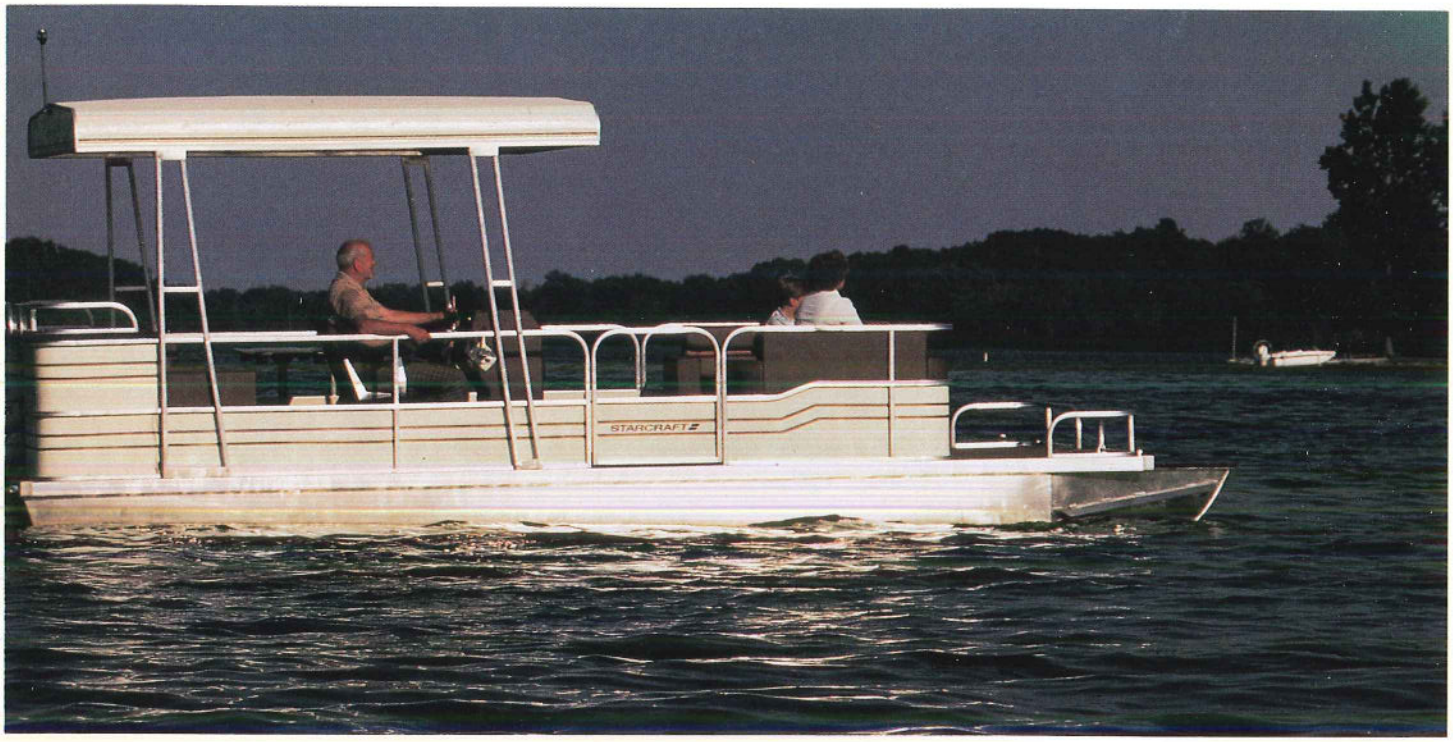
1985 STARDECK PONTOON BOATS



STARCRAFT®

Starcraft has two luxurious StarDeck models.

StarDeck 200

The new StarDeck pontoon boats are built with lots of standard features. The SD 200 has an upholstered console with a courtesy light and a lockable glove box, a carpeted ¾" plywood deck, and a stainless steel steering wheel. The canopy has a roomy built-in storage shelf.

Swim from it, fish from it, have a barbeque on it... The SD 200 is versatile enough for almost any on-water activity.

The optional rear sofa gives you extra seating and more built-in storage.

A Better Product...You Expect That From Starcraft

Starcraft is the world's leading aluminum boat company for a number of reasons: proven manufacturing techniques, innovative engineering, top quality materials, and fair prices.

The knowledge and experience we've gained through the years are evident in our new line of StarDeck pontoon boats. They're better by design. We start with durable .090 marine aluminum, a heavier gauge than you'll find on most competitive models. We also install more lateral floor support stringers for a stronger deck platform. From the stern forward, the first six floor stringers are spaced twelve inches apart to help counteract engine torque. This construction method helps reduce stress on other assembly points, which may weaken and wear as running time accumulates. We use stainless steel fasteners, and chromium plated bow eyes and tie-up cleats for maximum resistance to rust and corrosion. Our pontoons are filled with foam flotation for additional safety.

In addition to superior materials and methods, Starcraft pontoon boats have many standard features that may cost you extra on other brands. The console has a stainless steel steering wheel, courtesy light, and a lockable glove box as standard equipment. We use solid teak wood accents and trim...not plastic. The captain's chair pivots and adjusts forward and back for optimum driver comfort.

Both are built with quality to last through the years.

The deck area on our SD 240 gives an incredible 128 square feet of floor space, which makes it almost a living room on the lake. It has all the standard features found on the SD 200 plus a full-width rear sofa, that doubles as a carpeted sun deck.

There's an optional dinette available on the SD 240 that adds a lot of convenience without adding a lot of extra dollars. The table has built-in, recessed drink holders. The forward seat easily adjusts to face forward or back, and has a large capacity ice chest down below.

Both StarDeck models are built with quality that will last for many seasons of trouble-free performance. Be sure to compare our quality and standard features before you buy any other brand.

StarDeck 240

Starcraft Southern Operations

StarDeck pontoon boats are made at our plant in Delhi, Louisiana. This facility has been building boats for over twenty-five years, and last year produced and shipped over 10,000 units.

We've invested hundreds of thousands of dollars in equipment and machinery designed exclusively to bend, roll, form, cut and shape aluminum to our own exacting specifications. We also have an experienced, knowledgeable staff that can deliver cost-efficient, high-volume production while still maintaining our high standard of quality control.

The new StarDeck pontoon boats have been built with all the quality and expertise that have made us the world's largest boat company. They're a better boat by design. But then...you wouldn't expect anything less than the best from Starcraft.

More luxury for your StarDeck.

A dinette with reversible seating is available on the StarDeck 240.

A full width rear sofa is optional on the SD 200, standard on the 240.

The optional front sofas give you additional seating and storage.

The SD 240 dinette also features a built-in ice chest.

The cushions on the rear sofa reveal large hidden storage areas.
